Welcome to the biggest event in Millah Murrah's history.

Preparing this sale has been months, if not a year in the making. The initial decision was easy. Dimity and I want to be freed up, to focus more on our growing kids. The choice to put a cap on the growth of the herd was a simple one. But working out what to sell was agonizing.

Our previous female sales have always featured mature age group dispersals. There is no question it is a significant setback to relinquish that section of the herd. We dabbled with selling all the unjoined heifers and recipients, but that would be worse. That is the front line of any well-designed Stud programme. Ultimately, we arrived at what we think is a most satisfactory solution, both for us and for purchasers of our cows.

The females described in this catalogue represent a true sharing of the herd. If we were to switch roles and sell everything not included in the sale, and retain the contents of this book, I believe it would leave us on a similar footing.

It is an amazing group of breeders. And there's plenty of them.

Features of the offering include:

- All the PTIC autumn-calving M drop heifers (siblings to the bulls that sold last month at \$15,590 - the 2nd highest average in the history of the breed)
- The entire L drop section of the herd (siblings to the \$16,348 industry record average priced bulls of 2016).
- A superb selection of older females, including many donors and donor prospects.

There are no loop holes regarding the M and L drop females. Anything from those sections not included in the sale will be removed from the Stud register after their calf is weaned. It is a true dispersal of this section of the herd.

While not yet sleek, as in many of the catalogue photos captured over previous summers, the cattle present in wonderful order. The cows with calves at foot are ready for ET or AI programming, or natural mating, immediately on arrival at their new homes. The pregnant females for Autumn calving have passed the danger zone for travelling.

My favourite part of this profession is “designing” the cattle. That is, working out what bulls to use in the herd, then how best to use them. For a Stud cattle breeder, this is our canvass. I think this is some of the best work Dad or I have ever done. The match ups to create the pregnancies & calves will have a spectacular outcome; phenotypically and objectively.

From any view point, this is an extraordinary opportunity to access females from one of the best herds in the business. It is hard to argue that if one person owned this entire catalogue of cows & heifers, they would immediately possess one of Australia's leading Angus Studs, with over 100 bulls to sell in 2019!

There will be ample time to inspect the cattle the day before and the morning of the sale. The cattle will be yarded from 4pm on the evening before the sale. Gates will open on the morning of the sale from 6.30am ahead of the 11am start. NB with cows & calves to handle, we will commence moving cattle to the selling pens at 10.30am, so effectively inspection in the viewing yards will cease then. It will be a long sale, so a cushion could come in handy.

We will be providing a casual BBQ meal, with meat supplied by Alexander Downs Group, the evening before the sale and breakfast on sale morning, as well as lunch and refreshments after the sale.

Please join us!

Ross & Dimity Thompson

STUD FEMALE SALE

at "Goonamurrah", 1202 Turondale Road, Bathurst

Thursday 19th October 11am

(NB from 10:30am cows will be moving to the pen up yards)

243 Registered Females

**Inspection from 4pm to 7pm, Wednesday 18th October
and from 6:30am on sale morning.**

COMING FROM BATHURST

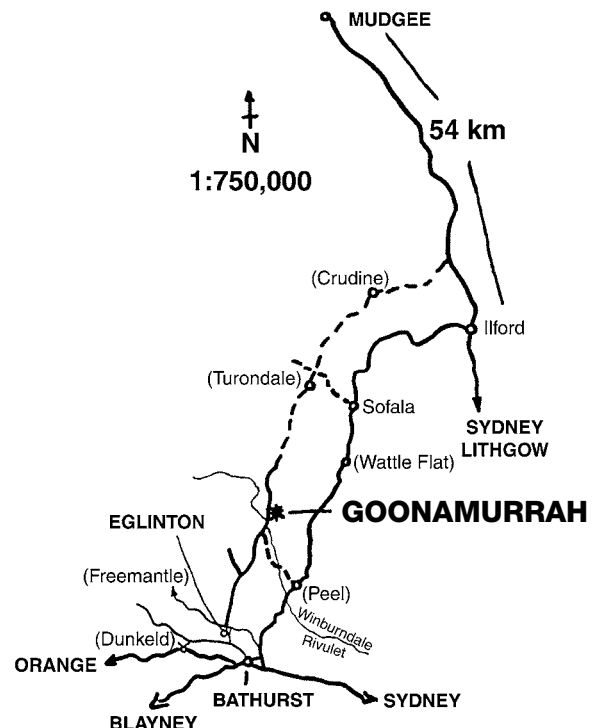

Follow Durham Street, past All Saints College, to Eglinton. From Eglinton, take the Hill End via Turondale Road, for 20 km, "Goonamurrah" is well signed on the right hand side.

COMING FROM MUDGEES

Take the Sydney Road. At Ilford turn right on the Bathurst road. About 28kms from Ilford you will cross the Turon River at Sofala. Once over the bridge, take the road to the right towards Hill End. Follow this winding sealed road for about 5-10km, until you come to an old tin shed on your left and a left turn to Bathurst. Travel about 25kms along this road towards Bathurst. You will cross Millah Murrah creek and about three kms later, "Goonamurrah" is on the left hand side.

MILLAH MURRAH ANGUS

SALE DATE AND PRIOR INSPECTION TIME:

Selling will commence at 11am on Thursday 19th October 2017. Undercover shelter is provided. Sale cattle may be inspected between 4pm and 7pm the evening before the sale (Wednesday 18th October) and from 6.30am on the morning of the sale.

SELLING SYSTEM:

Sale of animals will be conducted under normal auction conditions. Please check with the Selling Agents to obtain a buyer's number if you are considering making a purchase. Successful Purchasers are requested to give written advice to the Selling Agents, regarding transport arrangements, at the conclusion of the sale.

REBATE:

2% rebate to outside agents registering **buyers, in writing, PRIOR to the sale**, and settling on their behalf within 7 days of the date of invoice.

PHONE & ONLINE BIDDING:

Sale day land line phone number is 02 6337 1157. An alternate number is 02 6337 1183. Mobile phone service should be reliable, following installation of boosters at the sale venue. Live Online Bidding is available through Elite Livestock Auctions. See page 3 for details.

GST:

All animals are sold **exclusive** of GST.

INSURANCE:

Selling Agents will be available on sale day to organize all insurance requirements.

DELIVERY:

Purchasers are requested to arrange delivery within one week of the sale. Stephen Smith of Dick Smith Transport Dubbo, will be at the sale and will be co-ordinating transport. Please speak with Stephen or David Simpson of Elders regarding your transport intentions at the sale's conclusion. **It is imperative that clear instructions are given right away.** Steven's contact details are as follows; telephone number - 0428 636 236, Office - 02 6882 2463, Email - dst@bigpond.com. We highly recommend Dick Smith Transport Dubbo for the safe and reliable delivery of your new animals.

REGISTRATION TRANSFER:

Buyers must supply their NLIS number, Angus Society Herd ID and, if the herd into which the animal is being transferred is EU accredited, this must be specified on the Buyer's Instruction form please.

HERD HEALTH & MANAGEMENT

Millah Murrah cattle are EU accredited

Under the new Johnes Beef Assurance Score (J-BAS) system, Millah Murrah Angus Stud cattle carry the highest level of assurance possible.

J-BAS 8

Previously Millah Murrah has carried MN3 status since 2001. Our biosecurity programme is overseen by our veterinarian, Dr George Corones (N7627).

Pestivirus: The autumn-calving L drop females and older were run with known PI animals for approximately six months from weaning. Sample blood tests indicate well over 90% auto vaccination from this practice (the two most recent tests were 100%). The L drop females with calves at foot and M drop females were not auto vaccinated. They received Pestigard vaccinations, with their most recent booster dates as follow: M Heifers 7th March 2017, L cows with calves at foot 8th May 2017.

We aim to use as few drugs as possible on our cow herd. It is prudent to introduce purchased cattle to the herd health regime of their new home as soon as is practical.

No animal has had its feet trimmed in any way.

Animals have been run on pasture all their lives post weaning, with occasional hay and silage as seasons dictate.

The cattle are used to being handled on foot, with ATV's and utilities and horses. They are used to being worked by dogs.

All cattle at Millah Murrah are rigorously screened for temperament. However, this is no guarantee that they will behave on sale day. This is particularly so for cows with calves.

HEALTH AND SAFETY OF VISITORS:

Visitors enter the pens at their own risk and are advised to carry a piece of the poly pipe provided. Children under 16, frail and elderly people are requested not to enter the pens. People with mobility aids should not enter the pens.

All the cows are known to be of placid temperament under normal conditions. However sale day is not "normal conditions".

Suckling cows, in particular, present a very real threat to human safety, and visitors need to be especially alert for an overprotective mother becoming aggressive.

If you enter the pens, take note of your surrounds, and be conscious of where you can seek safety, such as the hay racks.

Do not crowd the cows, or loiter in the pens.

We cannot cover every example of the dangers presented by the cattle. Use common sense and be alert at all times.

If you feel threatened whatsoever, please do not act hardy. Do what is necessary to ensure the safety of yourself and others in the pen.

This message is not meant to be alarming. We don't expect problems, but it is critical that visitors pay attention to the risks associated with the day.

RECESSIVE GENETIC CONDITIONS:

Except for Lot 110, all animals in this sale are free by test or pedigree of the four known identifiable recessive genetic conditions: AM, NH, CA & DD. Lot 110 is DDC.

HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

Welcome to the new age of selling livestock in Australia and "Happy Bidding"

-  1 Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device
-  2 Click on the "Sign Up" page / link
-  3 Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer.)
-  4 Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
-  5 Click "Register"
-  6 You will then be notified by email that an account has been created
-  7 Once an account has been created you are all "Set to Bid"
-  8 Each auction can then be viewed by clicking "Live Auction" logo on the Elite Livestock Auctions website
-  9 Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "Request to Bid"
-  10 The sale agents will then approve your application to bid and on the sale catalogue you will see "✓ Bid Request Approved"
-  11 On Sale day simply login, click "Enter Auction" on the catalogue page and you can start bidding.
(There is no need for software download)
-  12 At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

HISTORY & HIGHLIGHTS

In 1969 Wyatt & Winsome Thompson commenced the Millah Murrah Angus Stud with foundation females from the renowned Wallah herd, at Narrabri.

Six cows were purchased from the Flower, Abigail and Prudence families. The Ela, Rado & Brenda families were added soon after, from Muskerry and Glengowan herds.

Additional female lines were added, but fell by the wayside, over the ensuing 44 years. Today, almost every cow in the herd stems from these original 10 foundation animals.

1972 Sydney Royal Easter Show; Millah Murrah Naquire with Wyatt Thompson on the halter in 6th position.

Millah Murrah cattle were exhibited at local and Royal Shows for 20 years from the early 1970's. The highlight came at Sydney Show in 1989, when Millah Murrah E13 was awarded Supreme Angus Exhibit.

1989 Sydney Royal Easter Show; Supreme Angus Exhibit, Millah Murrah E13, sashed by Mrs George Georges, with Judge Charles Bott, Naranghi Angus & Ross Thompson on the halter.

We also competed in Hoof & Hook competitions, winning five champion ribbons and supplying eight Stan Hill representatives to Angus teams that regularly won at Sydney Show during the 1990's. In 1997 we achieved the rare feat of all three steers selected for the Angus Stan Hill team being sired by Millah Murrah bulls. This achievement was equaled in 2009, by Brian Brooker, when three Main Camp steers were selected as the Angus Stan Hill team. Incredibly they were all by Millah Murrah bulls.

1997 Sydney Royal Easter Show; Angus Stan Hill Trophy Team, all steers by Millah Murrah Bulls. Hugh Bowman, Gordon Frazer and Ross Thompson on the halter.

Jane Thompson at Sydney Show in 1986.

1986 Castle Hill Show; Wyatt and Jane Thompson with Millah Murrah Dalbert D11.

HISTORY & HIGHLIGHTS

In 1988, we conducted our first on property bull sale and these have continued annually ever since, with occasional auctions of commercial and Stud females.

Some sale highlights include:

- 2000: Australian record price for commercial Angus breeders (\$2300 each for 10 four year old cows & calves)
- 2001: NSW record average price for an Angus bull sale (64 bulls @ \$6500)
- 2001: Australian record price for commercial beef breeders of any breed (\$2700 each for 10 two year old heifers & calves)
- 2003: Australian record for an Angus bull sold at auction (\$41,000 for Millah Murrah Woody W100)
- 2003: Australian record for an Angus cow sold at auction (\$34,000 for Millah Murrah Brenda U7)
- 2005: Australian record price for commercial beef breeders of any breed (\$3400 each for 11 four year old cows & calves)
- 2011: Australian record average price for an Angus bull sale (80 bulls @ \$8850)
- 2012: Highest average price for a single vendor bull sale of any breed for the year (85 bulls @ \$8612)
- 2013: Australian industry record average price for a cow sale of any breed (112 @ \$7960)
- 2013: 2nd highest average bull sale of any breed in Australia for the year (96 @ \$8016)
- 2014: Australian record average price for an Angus bull sale (95 @ \$9147). Highest priced Angus bull in Australia for the year, H250 @ \$70,000.
- 2015: Australian record average price for an Angus bull sale (105 @ \$14,896). Australian record price for an Angus bull, K35 @ \$150,000. 2nd highest priced bull in Australia for the year, K42 @ \$80,000.
- 2016: Australian industry record average price for a bull sale of any breed (109 @ \$16,348). Highest priced Angus bull in Australia for the year, L133 @ \$85,000.
- 2017: Highest average for a bull sale of any breed YTD (122 @ \$15,590). 2nd highest average of all time for an Angus bull sale. Australian record price for a yearling bull, Klooney M182 @ \$50,000.

In 2003, as part of family succession, we sold all the stud cows, retaining just 75 weaner heifers and a hand full of recipients. This was the nucleus for the stud today and illustrates the opportunities available through this sale.

Millah Murrah matrons break Angus sale record

By CARLA WELSH-BARTH

It was a record-breaking day for the Angus breed at the Millah Murrah Angus Sale on Friday, 14th October, 1988, when the sale of 100 Angus cows and calves broke the previous record of \$1,200,000 set by the same breed at the same sale in 1987.

The sale, which was held in order to celebrate the 25th anniversary of the Millah Murrah Stud, was held at the Millah Murrah Stud, near Invermay, Victoria.

The sale was held in order to celebrate the 25th anniversary of the Millah Murrah Stud, which was founded in 1963 by Tom Gordon and Ross Thompson.

The sale was held in order to celebrate the 25th anniversary of the Millah Murrah Stud, which was founded in 1963 by Tom Gordon and Ross Thompson.

The sale was held in order to celebrate the 25th anniversary of the Millah Murrah Stud, which was founded in 1963 by Tom Gordon and Ross Thompson.

Cattle market continues slow run

THE CATTLE MARKET continued its slow run on Friday, 14th October, 1988, with the sale of 100 Angus cows and calves at the Millah Murrah Angus Sale.

The sale was held in order to celebrate the 25th anniversary of the Millah Murrah Stud, which was founded in 1963 by Tom Gordon and Ross Thompson.

Hector M153 sold for \$40,000 in 2017 to Kamilaroi Angus

Information about our herd and the animals in this sale:

Breeding Principles

Doing ease has always been at the heart of Wyatt's and my breeding decisions. In basic terms, a good doer is a cow that can hold her condition longer than average in tough seasons, whilst annually raising a good calf. But to us, doing ease describes a much wider range of factors, critical to commercial beef production: sound structure and temperament, natural fleshing ability, a roomy body type and, above all, strong maternal instinct.

All my life, I have heard that Millah Murrah cattle are "good doers". It is something of which we will never lose sight. And it is something for which my parents deserve most credit, as the renowned doing ability of the Millah Murrah cattle of the 21st Century is a legacy of their years of dedication to female type and function.

Pedigree Assurance

We have been routinely DNA parent verifying every retained female since 2003. To the best of our knowledge, Millah Murrah has the greatest record of continuous DNA pedigree QA of any major cattle Stud in the world.

We have taken a sample from every calf in the sale and will have them DNA parent verified before the end of the year. We recommend purchasers of the pregnant Lots do the same when their calves are born next Autumn.

Across this number of cattle, we know from experience that there is likely to be one or possibly two errors. To this end we make the following statement regarding the parentage of the calves at side and pregnancies in utero:

DISCLAIMER:

Every endeavour has been made regarding the accuracy of the pedigrees of the calves and pregnancies in this sale. In the case of an error in the parentage described, provided we can ascertain the true sire, Millah Murrah does not assume any responsibility for the error. In the unlikely event that a calf cannot be verified to any parentage, Millah Murrah will refund 1/3 of the purchase price of the Lot in question.

Ben Simpson has been working with our herd for many years.

Designing the Herd

Over 80% of bull calves born see active service in the field.

This high rate is brought about by the exhaustive research put into sire selection. Since 2011, I have inspected every sire that has entered the herd. No one gets it right every time, but unquestionably we have lowered the "error rate" of our genetic pairings. Seeing potential sires 1st hand, generally results in one of three decisions:

- (a) don't like the bull
- (b) like the bull, but he doesn't fit what we need at that point in time
- (c) like the bull and can make a judgement on how best to use him in the herd.

In many cases the inspection goes much deeper. One thing that has helped in recent times is meeting the breeder of many of the bulls. We realize perfection is out of reach in this game, but talking about cattle breeding with the person who bred the sire under consideration, gives a good feel as to his suitability for our programme.

With this knowledge, the pregnancies and calves in this offering are superbly designed. It is our attention to phenotype detail, paired with pragmatic use of Breedplan that sets our programme apart and has resulted in the amazing run of sale success this decade.

Approach to Breedplan

Millah Murrah has been a disciplined participant in Group Breedplan for almost 30 years. It is a great tool however, we feel it is increasingly misunderstood and misused. The "endless horizon" pursuit of fancy numbers is not improving the efficacy of the breed. We use EBV's as they were intended. We find a sire which suits us on type, then examine the figures. We then find a way to introduce that animal into the herd, with cows that are likely to balance out the objective shortcomings.

As a rule of thumb, our general target with EBV's is to keep abreast of the breed average or a little ahead. In this fashion, we have always felt that objectively, Millah

Murrah cattle represent the breed as it sits today. Consequently, they are ideally positioned to perform the key functions of Angus in the broad cattle industry. We are more than happy to leave other breeds to take their place in the market, in their areas of strength. Our firm belief is that the Angus role is as the industry's great all-rounder and provider of the mother cow. So much of this depends on the physical makeup of the animal, not fanatical, computer driven decisions.

Fine Tuning the Cow Herd

We assess our cows continually and cull without fear or favour. Culling includes so many factors and the level of ruthlessness is what sets the best herds apart. The assessment schedule takes the following approximate course:

- Assessment at weaning
- Pregnancy testing
- Calving
- Assessment before rebreeding, including calf quality
- Pregnancy testing
- Calving – and so on

This is not to mention genetic defect carriers, EBV's, deaths - the list goes on. It is a Stud breeder's role to prune without emotion.

Every 3 – 5 years however, the culling becomes so effective that it is time to sell off some quality breeders. It is a curious thing, why in this country it is uncommon for an Angus Stud to sell breeding females except in

dispersal situations. This is not the case in other countries like the USA where the high-profile herds conduct cow sales regularly. It seems an opportunity lost, especially with the technologies like ET available to use today.

Approach to calving and rebreeding

Every animal in this sale was born unassisted and other than Lot 122, all the breeding age females have calved unassisted as well. Lot 122 had a genuine back to front presentation as a heifer.

The calving records of each female in the sale stands up to scrutiny. Due to a bull failure, a section of H-drop cows failed to conceive after their 1st calf and were subsequently relegated to the Recipient mob. After a couple of seasons, based on the job they were doing on their calves, their quality phenotype and background, we took the pragmatic decision to re-admit them to the Stud book.

Except for this anomaly, our policy with calving is the same as any normal commercial operation. Donor cows aside, if the cow fails to go in calf, it is culled from the seed stock herd.

Pregnancy scanning

James Sutton scanned the pregnant animals in the sale in August. James is an experienced operator, with more than 10 years performing the role for us. His results are extremely accurate, however we cannot guarantee the pregnancy will be as described in the catalogue, due to the vagaries of pregnancy ageing. If, upon DNA test, the calf is shown not to be of the parentage described, please contact us, and we will provide details to ascertain the correct parentage. The Disclaimer outlined on page 8 applies in this situation.

With the exception of the open donor cows at Lot 108, 113 & 126, Lots 109 to 243 are sold as pregnant, with no further guarantee as to the delivery of a live calf. However, in the unlikely event that things don't eventuate as described, please contact us, so that we can arrive at a mutually agreeable outcome.

SIRES OF FEMALES FOR SALE

At the back of the catalogue, there is detailed information on the joining sires.

Readers can use the internet to research the background of the cows in the sale. I have made comment below on some of the key sires of the cows, in alphabetical order.

ASCOT HALLMARK H147

Hallmark is breeding the house down. We first saw it with the initial draft of 10 sons at our sale in 2016. They averaged just shy of \$20,000 with a top of "just" \$24,000. Then we weaned the calves of his 1st daughters and it became clear there was a special bull on hand.

Like their brothers, the Hallmark daughters are big framed, powerful young cows, with ample soft fleshing and outstanding structure. They are a mouth-watering prospect to mate with some of the excellent, but smaller framed new sires like LD Capitalist or EF Commando. Or you could put them back with the likes of Reality or Hector. They provide endless avenues with sire choice.

Hallmark's maternal background is a first rate Millah Murrah lineage, combining the legendary Flower and Brenda families, with a lot of proven performance. Great sires breed better sons...I think this is the case with Emperor and Hallmark.

BOOROOMOOKA THEO T30

This is a legend of the breed and a very popular name in the background of any pedigree. We have bred a couple of outstanding sires from Theo. One is the \$80,000 Klooney K42, who is seeing widespread industry application, with incredible customer satisfaction. His 1st sons sold at our sale last month to an Australian record yearling bull price of \$50,000 and an average of \$20,222. The other notable Theo sire, is the less high-profile Jupiter J194. He is resident sire at Pheasant Creek Brangus at Wowan in Qld and has been used widely in the Banquet herd. Some other Stud's of note have sought to purchase the bull outright. Jupiter is the sire of M24 who fetched \$36,000 last month among a group of eight sons that averaged \$17,250. Theo also features behind the dam of the well know and highly regarded Doc F159.

As a sire of females, Theo works best when he is used over big framed cows. He injects lovely udder quality and femininity and a bit of old fashioned style into his daughters...hard to believe when you look at a photo of the bull!

COONAMBLE HECTOR H249

The first of our Hector females sell in the pregnant heifer section and it hurts to let them go. I saw Hector at Coonamble in early 2015, when I took the photo above. I liked his muscle pattern and overall style. Hector brings a totally different genetic line to the plate. His sons were incredibly popular at the bull sale last month, nine of them selling to \$40,000, to average \$18,677. His daughters include a couple of the features of the sale at Lot 181 and Lot 223. They are super feminine, beautifully made heifers, with lovely disposition. We have continued to use Hector quite heavily and will move onto one of our sons now to continue the line. He'll have an excellent impact on our herd.

COONAMBLE JESTER J268

Whilst at Coonamble to inspect Hector, I was very impressed with his grand dam, Bangadang Lowan A61. Jester J268 is a son of this cow and I viewed him at the same time. A61 is very much in the traditional mold; deep, wide and roomy, very reminiscent of Hingaia 469 cows. She is sired by a bull I have long respected for his maternal contribution in Dateline 7078. Jester has bred well here. His sons were well received at the bull sale recently, six of them averaging \$14,333. His pregnant daughters display similar thickness and sound make up.

EF COMPLEMENT

Complement is having a big impact on the breed. In one generation, he restores fill along the top line, and expression through the chine, like no animal I have seen since Woody W100. His daughters are very good mothers, starting to make an impact, with five of their yearling sons selling last month to average \$18,000. Despite the most sedentary of lifestyles, he retains an incredible muscle pattern. I took the photo on the previous page when Dimity and I first met Complement in 2013. A bit of age aside, not a lot had changed about him, when we caught up in June this year.

HINGAIA 469

Anyone familiar with our programme will know that 469 has been integral to the herd's evolution for almost 25 years. We first used him by AI in 1993. Since then we have layered him in periodically, providing such stability to the phenotype of the cow herd. Done with sensible genetic interval, line breeding is a critical tool for a pure breed herd, helping to establish uniformity of type. We have hit four lines of 469 in a pedigree on a couple of occasions! At our sale in 2015 I calculated that 75% of the bulls had 469 in the background, including his son, the \$150,000 Kingdom K35. It is easy to appreciate the impact this bull has had in our business. 469 daughters are a rarity these days. The cows at Lot 108 and 111 are special items.

LT DRIVEN

Dimity and I saw Driven working in the sand hills of South Dakota in 2013. He impressed for his body mass, terrific strong head and sound overall structure. His daughters carry similar physical traits, providing a strong genetic alternative from the mainstream. They are sure to appear behind some sale toppers in next year's sale.

MATAURI REALITY

Reality came on the scene just when we were looking to moderate some larger framed lines such as Conversion, Ironstone, Emperor and the like. I inspected him in early 2013. He is a small bull in stature, but has made a massive positive contribution to the Angus breed across Australia. He delivers functional, fertile, sound females.

MILLAH MURRAH DOC F159

Doc females are tremendous milkers, delivering some outstanding progeny into our herd. He brings the very best out in sires like Complement. Doc is behind the dam of the outstanding yearling Klooney sire, M182 purchased by Trio Angus for \$50,000. She sells at Lot 84. Doc is also the sire of J181 who sells in this sale at Lot 126, with two sons at \$28,000 and \$30,000 to her credit.

Physically Doc females are deep quartered, wedge shaped cows with enormous capacity through the mid piece. His pedigree brings the incredible growth advantage of his father, D78, moderated by Theo. It is a formidable combination. I can't wait to see what the next generation of calves from Doc dams uncover. Mated with the likes of Loch Up, it is an exciting prospect!

MILLAH MURRAH HIGHLANDER G18

G18 was the \$24,000 high seller at our 2012 bull sale. He's got the excellent Highlander x Woody W100 maternal background, supported by Glenoch Megaforce two lines further back. G18 imparts exceptional muscle to his progeny.

MILLAH MURRAH EMPEROR H125

Resident sire at Booragul Angus, H125 was part of the sire battery that delivered the Vincent's their stunning bull sale result in May that averaged just shy of \$14,000. He carries the awesome background of Highlander, Woody W100 & Henry VIII as his immediate maternal sires. His daughters ooze femininity.

MILLAH MURRAH JACKPOT J137

Jackpot comes from the \$13,000 Lot 1 cow, from our 2013 female sale, Prue E16, mated with the power and style of Silveiras Conversion. Jackpot's sons were red hot last month, 10 of them selling to \$32,000 to average \$17,000. The daughters are made in a similar fashion. They are larger framed heifers with wide, flat backs, that glide across the paddock with their head held high. They are beautiful natured and soundly made and provide an avenue to use some of the excellent smaller framed sires around at present like Capitalist, Reality, Commando and Hector.

MILLAH MURRAH KINGDOM K35

Boy it hurts to be selling the 1st daughters of Kingdom, but those are the rules of the sale and we have plenty more coming through. Kingdom's 1st sons were very popular last month. As the volume sire group, 17 of them sold to average \$14,000 and never dipped below \$10,000. However, from the outset, I felt his role was going to be stronger on the female side, given the strength of maternal lines in his pedigree. Kingdom's pregnant daughters in this sale are a stunning group of powerful future breeders. They are consistently extra roomy, big volume, large framed females with super temperament. They are such an exciting group when it comes to joining time, providing a pathway to use classy bulls like Capitalist, Commando and Reality that need an injection of power.

SILVEIRAS CONVERSION

Conversion imparts terrific volume and style to his progeny. His daughters have exceptional capacity and lovely clean front ends. They are an excellent complement to the likes of Matauri Reality, Hingaia 469 & Crusader. We like what we are seeing when they are mated to Klooney as well.

TE MANIA EMPEROR E343

Emperor was the best producing, ultra-high figured bull I had seen until he produced the son, Ascot Hallmark H147. His daughters are making a terrific contribution here; witness the \$85,000 Loch Up L133, whose maternal grand sire is Emperor. They are long bodied, well-proportioned cows, with a beautiful udder set up, and very versatile when it comes to sire selection. We have had excellent results from a range of sires over our Emperor daughters.

Heifer calf at foot by MM Lincoln L119, born 15/7/17, AA ID NMMN197. The sale kicks off with an awesome line of first calving heifers and calves. People often remark on the uniformity of our bull drafts. It is no different with the females. The product consistency of our cattle is something we have strived for since my parents founded the stud in 1969 and it has never been more evident than today. The classic mating of Reality on Conversion has produced a magnificent roomy, deep young cow in L154, with an ideal data set. We pride ourselves on getting the matings right. The calf here is genetically years ahead of the pack.

Heifer calf at foot by EF Commando, born 5/8/17, AA ID NMMN281. Two full brothers to L173 sold to average \$13,000 at our sale in September and I thought may have made alot more than that. The Lot 45 bull was special, well done Greg Reeves! L173 has maternal sisters in the sale at Lot 21 & 138. She is a classical modern Angus cow, with length and depth, beautiful head carriage and a great udder. L173 comes from an outstanding Highlander cow that had a big impact in our ET programme. There is added maternal depth with W100 & Henry VIII in the background. A lovely clean fronted calf at foot with plenty of scope.

Heifer calf at foot by MM Loch Up L133, born 18/7/17, AA ID NMMN212. Check out the udders on these young breeders. It is something we have worked hard on over the past 20 years and is now a standard feature. It takes decades and some harsh judgements along the way to get this sort of consistency in the herd.

Heifer calf at foot by MM Right Time F226, born 17/7/17, AA ID NMMN206. Big framed heifer by the \$24,000 2012 sale topper. The calf at side is by a bull doing amazing things at Womboramurra Black Simmentals. F226 is from one the best looking cows we ever bred, Y132, who sold for \$24,000 in 2013. She is a daughter of the legendary Abigail S104. We decided to use F226 by AI, over some of the more powerful females in the herd, wanting to tap into what are sublime maternal Angus genetics. It is an example of the two steps forward, one step back approach to breeding that has stood us in great stead over the years.

Bull calf at foot by MM Right Time F226, born 10/7/17, AA ID NMMN182. An outstanding package on offer here. L276 is the 1st daughter of the beautiful cow at Lot 95, carrying a brilliant maternal background down three generations of donors through F211 at Lot 112 to the impact dam D136. L276 is a high powered young cow on paper and an impressive animal to observe. The sire of the calf is doing a phenomenal job in the Wombramurra Sim Angus programme, based on his superb dam Y132, daughter of the matriarch Abigail cow S104. The calf N182 is a cow herd builder in the making, carrying some of the great names of the breed and an excellent balanced data set. Only time will tell how he grows out, but on paper he is a potential stud sire for sure.

Heifer calf at foot by MM Lincoln L119, born 11/7/17, AA ID NMMN184. Some quality line breeding evident behind L277, with double shots of Theo, BT Equator & Hingaia 469 in the pedigree. Line breeding, with adequate generation interval, is a fundamental pure breeding tool to establish cow herd uniformity and ultimately an even line of bulls. It is something my father engaged in from the outset and one of the key factors in the market place acceptance of our bulls.

Bull calf at foot by MM Loch Up L133, born 17/7/17, AA ID NMMN209. Two of the great Millah Murrah cow families converge behind this girl, in the Flower & Prue lines. They are backed by a double shot of W100, who brings the Brenda family into the mix, through two of his best daughters, including the \$22,000 D85. The most famous line of the Brenda family, descended from Y33, comes into the pedigree of the Loch Up bull calf at side. Regardless of all the modern aids to cattle selection, pedigree depth is still the most reliable guide to breeding quality cattle.

Bull calf at foot by MM Right Time F226, born 26/7/17, AA ID NMMN232. Powerful young breeder. Two sons of her dam have sold to average \$10,000. The mating to Right Time F226 taps into the exceptional Abigail S104/Y132 maternal line. Our approach with EBVs has always been to try and stay abreast of things, without chasing the frontier. It allows us to concentrate on the number one attribute of Angus - maternal function. So when we recognize the contribution a bull like F226 or K400 can make to our cow herd, it is just a matter of finding some girls that can carry them on paper. An exciting bull calf prospect here.

Heifer calf at foot by MM Lincoln L119, born 15/7/17, AA ID NMMN194. L151 is a lovely feminine type, displaying incredible length, whilst retaining a strong top line. Her maternal sisters sell at Lot 179 and the donor cow at Lot 71. The calf at side is an exciting prospect, by the \$28,000 highest selling Complement son at Millah Murrah.

Bull calf at foot by MM Loch Up L133, born 8/8/17, AA ID NMMN296. The Reality x Conversion match up is a proven winner, this time descended from the influential Rado cow D136, purchased by Ascot at our 2013 sale. With over 80% of the bull calves ending up as breeding bulls, the mating here with Loch Up looks a pretty safe bet to have produced a quality sire of the future.

Heifer calf at foot by Coonamble Hector H249, born 9/8/17, AA ID NMMN298. A young breeder with masses of capacity. Maternal brothers to L168 have sold for \$20,000, \$18,000 & \$22,000. We love the quality of heifer that Hector makes and his nine sons were red hot last month, selling to the 2nd high price of \$40,000 to average just under \$19,000. The calf at side here is a good one, with an EBV graph heavily oriented to the right.

Bull calf at foot by MM Kingdom K35, born 10/8/17, AA ID NMMN307. Two genetic brothers to L176 have sold for \$18,000 each. She carries the great modern pedigree of Complement on Emperor, with the consequent picture perfect EBV set. A great mating with Kingdom to produce the bull calf at side. If we retained him, he would be an early favourite to make the front pen of the 2019 bull sale. The 1st 17 Kingdom sons to sell averaged \$14,000 last month, none fetching under \$10,000.

See photo at Lot 28

Bull calf at foot by MM Loch Up L133, born 21/7/17, AA ID NMMN224. A great genetic match up behind L266. Her dam is the incredibly easy doing, smaller framed cow that sells at Lot 106. The last time she was mated with a big framed home bred bull like J137, F101 produced J181, the open donor cow at Lot 126, whose 1st two sons made \$28,000 & \$30,000. L266 comes from the grand Flower G20/Y141 line. She has a cracking bull calf prospect at side, carrying more maternal heavyweights from our herd with Brenda Y33 thrown in via Loch Up.

SCHURRTOP 8019 V141

Bull calf at foot by MM Lincoln L119, born 17/7/17, AA ID NMMN211. L288 is from a massive volume Ironstone cow whose pedigree tracks directly to the dam of Woody W100, Brenda U7, who sold in 2003 for the then Australian record of \$34,000. Her 1st son sold last year for \$12,000. There will be plenty of fleshing and capacity in the young bull calf at side when he matures.

Heifer calf at foot by EF Commando, born 4/8/17, AA ID NMMN277. Two full brothers to L293 sold last month for \$32,000 & \$28,000. Another son of the dam, by Kingdom, fetched \$18,000 as a yearling. This follows several other sons selling to \$20,000 in previous years. L293 comes from a prodigious production background. She is a donor in the making with a donor potential daughter at side.

Bull calf at foot by MM Right Time F226, born 16/8/17, AA ID NMMN313. L303 comes from the highly productive Rado D136 line. Her dam is by the \$20,000 2011 sale topper and has had sons sell for stud duties, including Complement K287 at \$20,000 to Dungay Park. Another G276 son fetched \$22,000 last month. L303 presents a perfect option to bring in the outstanding Abigail Y132/S104 backed maternal sire, F226.

Heifer calf at foot by MM Right Time F226, born 6/8/17, AA ID NMMN288. There is mega power in the background of this unit. The dam of L313 weaned twins weighing a combined 535kg in August, while hitting the scales in 5 score condition, weighing an extraordinary 900+kg. She is the only cow ever to pass that mark in our history. All this from a cow no more than frame 6, who had been running in our high country! Her capacity & doing ability is phenomenal. With Hallmark as the sire of L313, we might have pushed the power side a bit, but it provides a superb platform for the F226 sire, whose Y132/S104 background is so maternally strong. Maternal sister sells at Lot 172.

Bull calf at foot by MM Loch Up L133, born 5/8/17, AA ID NMMN283. This is a pretty slick package. The full brother to L315 sold to Dungay Park Angus for \$20,000 in 2016. Their dam is a strong donor cow for us, with \$18,000 in embryo sales over the past 18 months. They come from a very strong maternal line, founded on Rado D136, with three more of her daughters used as donor cows. The bull calf at side, by the \$85,000 2016 high selling bull in Australia, comes right out of the heart of our programme.

Will calve to MM Proceed L237 prior to sale. Details in the sale supplementary sheet. L306 is a superb heifer with an awesome background. Three sons of the dam have sold to average \$12,000, while the 1st 10 sons of her sire sold last month to average \$17,000. I love the generations of breeding behind her. The next four sires on the bottom side of the pedigree are: W100, 036, 469 & Powerplay M032, back to the matriarch Flower cows G20 & S110. That is amazing quality depth of pedigree that takes decades to achieve. This is an outstanding heifer with amazing volume. There is some chance the calf at side is by NMML188. We will advise the purchaser if this is the case when DNA results are returned.

Purchaser:..... \$.....

Bull calf at foot by MM Lincoln L119, born 1/9/17, AA ID NMMN344. A lovely type doing a terrific job on her calf in his early days. Like so many of the cows in our herd, L164 carries useful genetic diversity, built on rock solid foundations. Her pedigree is constructed on three doses of 469, two from Theo and a splash of Woody W100 in her ancestry.

Bull calf at foot by MM Proceed L237, born 5/9/17, AA ID NMMN352. Great breeding behind this heifer, descended from the impact Abigail Y116 cow who is still going, and has done so much to set the foundation at Mandayen Angus in SA. Highlander, Emperor, Crusader, Henry VIII, Renaissance, Kelp, 036 all feature in the background, with the power coming from D78...it is an amazing pedigree! There is some chance the calf is by NMML188. We will advise the purchaser if this is the case, once DNA parent verification of all the calves has been processed.

Purchaser:..... \$.....

Bull calf at foot by MM Proceed L237, born 29/8/17, AA ID NMMN335. The full brother to L216 sold for \$8000 in 2013. She comes from a really good type of cow, with an excellent sales record, who sells at Lot 105. All three of her sons made the sale as yearlings to average \$12,000. There is some chance the calf is by NMML188. We will advise the purchaser if this is the case, once DNA parent verification of all the calves has been processed.

Will calve to MM Proceed L237 prior to sale. Details in the sale supplementary sheet. L178 carries a top shelf pedigree. Her Mum is the classy donor cow that sells at Lot 128, and is full brother to Jupiter J194, whose eight sons averaged \$17,250, topping at \$36,000 at our sale last month. They descend from the prolific Flower cows G20 & S110. G18 is the \$24,000 2012 sale topper, whose dam sold for \$22,000 six months later to Mandayen. There is some chance the calf at side is by NMML188. We will advise the purchaser if this is the case when DNA results are returned.

Heifer calf at foot by MM Klooney K42, born 9/8/17, AA ID NMMN297. K168 carries an outstanding maternal pedigree, including the awesome power cow at Lot 120 and F141 who is becoming a very important part of our programme (she is dam of the star heifer Prue M4 at Lot 181). The genetic combination of Complement on Doc F159 has been irresistible at our bull sales with six bulls bred that way averaging \$16,000 at the last two sales. Bringing Klooney over the top to produce the heifer calf at side is genetic gold. Its full brother fetched \$16,000 to Womboramurra Black Simmentals at our sale last month.

Heifer calf at foot by MM Klooney K42, born 29/7/17, AA ID NMMN246. I love the pedigree of this cow and her sister that follows next. The massive W100 cow B64 meshes so well with Reality. The Klooney heifer at side completes the package here. She will make a superb breeder. Three full brothers to K178 sold to gross \$41,000 in 2015 & 2016.

Heifer calf at foot by Coonamble Hector H249, born 27/7/17, AA ID NMMN238. K210 is full sister to the previous Lot. The heifer calf at side carries a great balance of figures and some very useful genetic diversity. The young Hector females that sell in the M heifer group are special. His nine sons received excellent demand at the bull sale to average \$18,667. An exciting prospect here.

Abigail K210

Heifer calf at foot by Coonamble Hector H249, born 25/7/17, AA ID NMMN231. The style and make up of our cows gives great satisfaction. Another beautifully put together cow here, showing so much femininity. Mother and daughter carry ideally balanced data and all the hallmarks of donors in waiting

Bull calf at foot by MM Lincoln L119, born 1/8/17, AA ID NMMN265. This is an exciting package all round. K255 is from the excellent donor cow G265, who sells at Lot 115. She owns an exotic pedigree and brings plenty of paper performance with it, in a lovely phenotype. The mating with the \$28,000 L119, should result in a cracking sire when N265 matures. It hurts that we will not get to see it.

Bull calf at foot by MM Klooney K42, born 24/8/17, AA ID NMMN323. I love this young cow, to the point she joined our donor programme after the birth of her maiden calf, producing six eggs at her 1st attempt. K288 is long, deep and wide, with the thickness across the top our cattle are renowned for. That 1st heifer calf is one of the standouts in her soon to be mated contemporary group and like the calf at side here, is by Klooney. The full brother to K288 fetched \$14,000 at our sale last year. They stem from the superb Abigail S104 family line. The calf here has massive potential. With over 80% of our bull calves seeing active duty, it would be a game person to bet against this one. A special unit.

Heifer calf at foot by Coonamble Hector H249, born 17/7/17, AA ID NMMN205. A couple of the modern greats combine here to produce K166, backed by two of the great foundation cows at Mandayan in B10 and the Henry VIII matron Y116. Both mother and daughter carry a brilliant balance of data, right in the pocket we aim for. They present a wide range of joining options both phenotypically & on genotype.

Heifer calf at foot by Coonamble Hector H249, born 26/7/17, AA ID NMMN234. K203 is the daughter of a cow starting to make a big impact here. Aside from K203, F141 progeny includes the feature heifer by Hector at Lot 181 & another cracking heifer at Lot 182 and her first three sons, that have grossed \$34,000. There are some legends behind her too, with W100 & 469 on the next two lines of the maternal pedigree. This pair will make excellent females to breed on with. Good looks aside, once again they carry an excellent all round balance on paper. There are so many cows in this sale worthy of ET work that it would be folly to mention it every time, but this pair would certainly be under consideration if retained.

Heifer calf at foot by MM Kingdom K35, born 18/8/17, AA ID NMMN317. We flushed K225 as a 1st calver, with \$11,000 in embryo sales to her credit. She comes from a beautiful, modest framed, 24J donor cow. They are descendants of the famous Flower G20. We retain a couple of ET siblings to the calf at side.

Heifer calf at foot by MM Kingdom K35, born 10/8/17, AA ID NMMN306. K266 has already paid her way. Her 1st calf, by Klooney, sold as a yearling last month for \$22,000 to Coffin Creek. She comes from a beautiful, smaller framed cow that I always wanted to flush but felt was just too far behind on paper. So with Complement added to the mix, we flushed K266 after her 1st calf. We have ET siblings to her Kingdom calf on the ground this spring as well as \$8000 in embryo sales.

Heifer calf at foot by MM Loch Up L133, born 30/7/17, AA ID NMMN256. K269 is dam of the \$50,000 Australian record priced yearling bull, Klooney M182, that sold to Trio Angus last month. She was mated to another \$80,000 home bred sire to produce the heifer calf at her side and we expect a similar stellar outcome. N256 really does represent the highest quality cutting edge genetics. K269 & N256 come from a magnificent maternal background, through the \$14,000 Crusader daughter C43, on to the matriarch Flower cows Y141 and G20. Her full sister sells next.

Bull calf at foot by MM Loch Up L133, born 28/7/17, AA ID NMMN241. Full sister to the previous Lot, whose 1st calf set the Australian record for a yearling bull of any breed at \$50,000. This could even be the better package. Their full brother is an exceptional animal, selected by one of the best judges in the game, Andrew Chapman, for the Womboramurra Black Simmental programme he runs with Peter Howarth. A yearling Klooney son of K275 will work in the stud later this spring. He is a cracking young bull that will sell as a two year old. The Loch Up son at side here is a tantalizing prospect.

Bull calf at foot by Ascot Hallmark, born 28/7/17, AA ID NMMN240. Fantastic maternal pedigree with 469, W100 and Henry VIII in the mix, from one of our very best D78 cows, out of the Abigail S104 family tree. Three full brothers to K253 sold to average \$14,000. Full sisters sell at Lots 58, 129 & 130. They present a genuinely rare opportunity to access the legendary 469 line. Hallmark over Hingaia 469 is a mating that works every time.

Will calve to MM Kruse Time K400 prior to sale. Details in the sale supplementary sheet. This is a terrific cow and a great display of how Brenda F6 (Lot 108) responds to whatever sire she joins. J23 is our favourite D78 daughter. She has \$10,000 in embryo sales to her credit, yielding 20 A grade embryos from three flushes. Her 1st two natural calves made \$20,000 and \$16,000. I love the mating with K400. We are never afraid to take a few steps back on numbers to entrench the maternal foundations in our herd. The pedigree of the calf is without peer for cow power.

Bull calf at foot by MM Loch Up L133, born 31/7/17, AA ID NMMN260. Ironstone is such an under rated maternal sire. His fat figure is very misleading in terms of the doing ability of his daughters. They are incredibly easy keeping cows that do a top job on their calf. H321 is a great example. She is a powerful, deep cow, a very impressive sight. Two of her sons have sold to \$16,000. There is a double up of thickness with Loch Up as father of the young bull at side. He should grow into a top sire.

Heifer calf at foot by Coonamble Hector H249, born 14/9/17, AA ID NMMN358. Lovely genetic combination here with Crusader and Emperor coming together on top of Henry VIII. It is just a brilliant maternal platform, that goes back further to some great foundations in Naranghi J200. B10 has 46 progeny recorded and comes from a prodigious breeder in Abigail Y116 (36 calves). They are part of the engine room for the flourishing, heavily Millah Murrah influenced, Mandayen herd in SA. H224 was flushed once for four A grade embryos.

Heifer calf at foot by MM Kingdom K35, born 20/7/17, AA ID NMMN223. A lovely style of cow here. H219 is always the 1st to get a slick coat and carries plenty of flesh through the quarter. Two sons have sold to \$12,000. I have made a point of not nominating donor cow suggestions in this catalogue, because I think so many of them warrant it. This is an example. Put her to Kingdom or Hallmark or something with plenty of punch and you are off to a great start.

Prue H219

Heifer calf at foot by Coonamble Hector H249, born 29/7/17, AA ID NMMN251. The 1st son from H202 made \$12,000 and her 2nd son is the calving reference sire for this catalogue, Proceed L237. She is an excellent type from the wonderful background of Flower G20, Y141 and the \$17,000 C69 and only comes forward because we can source plenty of her influence through the son. Another cow among a big stretch of cows well worthy of ET work. The Hector x Emperor match up is a beauty.

Will calve to Ascot Hallmark H147 prior to sale. Details in the supplementary sheet. Typical, heavy fleshed 469 daughter from the Flower G20/Y141 line. Her daughter is the Open donor cow that sells at Lot 126, whose two sons to date have sold to studs for \$28,000 & \$30,000. Another F101 daughter sells at Lot 34. A son has sold for \$10,000. Hallmark over deep traditional cows like this never fails to deliver. This is a great chance to access the legendary 469 line from a magnificent pedigree background, with a near certain star of the future at her side.

Open. Brenda F6 has over \$180,000 in earnings, including more than \$75,000 worth of embryo sales, into 13 herds. She is the dam of the Lot 94 donor cow in this sale, as well as the 1st calf heifers at Lots 207 - 209. F6 has produced eight sons that have sold through the sale to gross \$105,000 including a \$20,000 yearling bull by Hector at the sale last month. She is a daughter of the great matriarch cow Brenda Y33 & Hingaia 469. F6 is a very hard cow to value, producing up to 22 A grade eggs in one hit and rarely generating under a dozen. She is only a moderate sized cow, but very well made. You could build an entire herd from her. Flush F6 to any high performance bull, she will put in the structure and doing ability. They do not need big numbers or flashy modern pedigrees to do the job. F6 is a special cow, one of my favourites in the herd and one destined for Matriarch status. Not flushed since the start of winter, she sells open, ready to programme for ET or join for natural calving.

PTIC to MM Loch Up L133. AI date 6/5/17. The cover girl. F58 is a great phenotype cow with a genuine outcross pedigree & excellent production record. All four of her sons have made the sale to gross \$50,000, including the \$20,000 Hallmark son L83, to Langi Kal stud in 2016. Her only daughter is the outstanding Conversion donor cow at Lot 123. Initially when we decided only to offer young cows & heifers in the sale, some valued clients asked us to include some older, less genetically fashionable cows in the sale as well. We obliged, this is a prime example and we hope you will show up to bid on them! F58 has proven beyond doubt that she is donor quality. She is a Stud foundation standard cow. All you have to do is add a bull to the mix to bring the numbers up to par, like we have done here with Loch Up. She will breed well to whatever you mate her with.

PTIC to MM Loch Up L133. AI date 6/5/17. Sometimes you just have to look past the minutiae of things like genetic defects and appreciate all the other strengths of a cow. F91 is a beautifully made cow with a great production record. That is what counts. She is a direct descendant of the matriarch Brenda Y33, with four sons sold to \$16,000 to gross \$44,000. An excellent daughter by Hector sells at Lot 215. F91 has a Stud foundation quality phenotype and should be used for ET regardless of her positive DD status.

PTIC to Ascot Hallmark H147. AI date 6/5/17. Beautiful smaller framed donor cow with an awesome maternal background, stacking 469, Alliance and Crusader through to the matriarch Abigail cow S104. F102 has made over \$13,000 in embryo sales into six studs across Australia. Five F102 sons have made the sale. Three of them have sold to Studs including Fern Hill, Five Star and the \$20,000 L58 to Inglebrae Farms in 2016 (full brother to the pregnancy in utero). A daughter sells at Lot 229. F102 is a real dynamo - a special cow.

PTIC to EF Commando 1366. AI date 6/5/17. While G41 shows the effects of several rounds of ET work recently, we know what this cow can breed. She is the dam of Kingdom K35, the \$150,000 Australian record priced Angus bull. Her production record does not pull up there. G41 has produced a further six sons, with five of them making the sale to average \$17,000. This gives her the amazing record of six sons averaging just shy of \$40,000! G41 has a daughter in this sale at Lot 10. Her last three flushes have produced an average of six A grade embryos each. There is a slight chance G41 may have been served by MM Proceed L237 on the date of AI, so her calf should be DNA parent verified before registration.

See photos overleaf

PTIC to MM Loch Up L133. AI date 6/5/17. H55 is a phenomenally easy doing cow, as we have come to expect from a pedigree carrying Ironstone and Crusader. Her 1st son made \$8000 & her 2nd son made \$14,000 last month. A daughters sells at Lot 175. Expect some incredible thickness when the Loch Up calf arrives.

PTIC to MM Kruse Time K400. Hand served 30/5/17. One of my favourites. H112 did alot of ET work in 2016/17, which saw her raise more than \$35,000 in embryo sales during that period. Additionally we have retained 25 embryos and pregnancies. H112 is full sister to H113, the dam of the \$54,000, Genetics Australia sire, Lakeside L69 & the \$40,000 Hector M153. They are daughters of the prolific Crusader cow Prue C48 whose impact is fast tracking her to Matriarch status. Three H112 sons sold to date have grossed \$36,000. With all her progeny due to come forward across the country, it is only a matter of time before H112 produces a semen sire. This is a great foundation cow opportunity. The pregnancy carries a quite extraordinary stacking of famed maternal bloodlines, with 24J, a double cross of Crusader & 469 and Henry VIII in the recent background. A heifer calf would be ideal, but that really is the entree before getting H112 back to embryo production work.

PTIC to LD Capitalist 316. AI date 10/6/17. Lovely feminine young donor cow, descended from the matriarch Brenda cow Y33 and maternal sister to the excellent donor cow at Lot 113. Their dam sold for \$11,000 in 2013. Two H169 sons have sold to date as true yearlings to average \$12,000. H169 is an excellent embryo producer and has been one of the most popular donor cows on inspection over the past two years. She has \$30,000 in embryo sales across eight herds to her credit, with over a dozen retained in the herd. H169 is showing some effects of her extensive recent ET work. She still presents very well, carrying an exciting, well considered pregnancy to Capitalist.

PTIC to EF Commando 1366 . AI date 10/6/17. H313 is a seriously powerful cow, the 1st calf of the equally commanding cow F141, whose Hector daughter is the standout M heifer in the sale at Lot 181. Due to no fault of their own, H313 & the cows lotted either side of her, H318 & H230, failed to get pregnant, after their 1st calf was born and were routinely relegated to the recipient herd. Based on the quality of the ET calves they weaned, their phenotype and ancestry, we made the common sense move to re-instate them a couple of years later. H313 is a great prospect. She is the ideal foil for Commando, who I like so much and is the sire of the pregnancy in utero. A daughter sells as Lot 61.

PTIC to MM Loch Up L133. AI date 5/5/17. Another great maternal pedigree for the aficionados of our programme, descending down the Abigail line through the matriarch S104 and her beautiful daughters, the \$22,000 Y132 & \$9000 A28. F159 adds some oomph to the mix. The value of the pregnancies and calves at foot on the females in this sale cannot be over stated, with a wonderful prospect in utero here. The 1st son from K151 was a cracking Complement bull that sold for \$16,000 in September.

Purchaser:..... \$.....

PTIC to LD Capitalist 316. AI date 20/5/17. The first of an extraordinary run of 15 young cows by Hallmark. They are powerful females, with oodles of fleshing. The match ups for the pregnancies are spectacular. This is a beautiful daughter from the full sister to Brenda F6 who weaned a cracking K400 bull calf, weighing 280kg when weaned at five months. Full sisters to L97 sell next & at Lot 201. Their full brother was retained for stud use by Mandayen Angus in SA. Their grand dam is the matriarch Brenda Y33. That is a pretty strong background for Capitalist to add to. I am certain there will be AI sires from the calves and pregnancies in this sale. The calf here could be anything.

PTIC to LD Capitalist 316. AI date 28/5/17. Boy there is some power in the pedigree of this cow and it shows. There is a genetically identical female next at Lot 143, with similar outstanding phenotype and a maternal sister sells at Lot 230. The mother and full aunt of L18 are absolute standout cows in their drop, with the excellent BT Equator cow behind them, E16 who sold as Lot 1 at our 2013 sale for \$13,000. The pregnancy is among the 1st crop of Capitalist progeny to sell in Australia. This is well considered, cutting edge genetics at its very best. A very exciting package.

PTIC to LD Capitalist 316. AI date 21/5/17. A full brother to L93 sold for \$9500 at the Coolie bull sale in August. Great pedigree back through the prolific Woody W100 cow, Flower E60 - who is doing such a great job at Heart Angus - all the way to the matriarch Flower G20. The Capitalist x Hallmark combination in utero represents the best of next generation Angus in Australia.

PTIC to EF Commando 1366. AI date 5/5/17. L50 is the 3rd of five daughters to her dam, with a maternal sister selling at Lot 218. She is a typical Hallmark female; structurally strong, with a lovely flat topline, clean front, feminine outlook and plenty of growth. Like most Australians who have seen him, Dim & I loved Commando when we saw him last year. He needs to be used on larger framed, higher growth cows like L50, and we anticipate some wonderful outcomes.

PTIC to MM Loch Up L133. AI date 5/5/17. Another beautifully considered pedigree combination that runs deep. The Reality x Conversion cross is a proven winner, this time built onto the \$14,000 Crusader cow C43 and backed by the matriarch Flower cows Y141 & G20. Why is all this relevant? Because in long established herds, some maternal lines rise time and again and remain the greatest predictor of reliable performance of descendant generations. Loch Up as the pregnancy sire is the cream on top.

PTIC to MM Kruse Time K400. Scanner estimates natural service date circa 18/6/17. Big framed cow by the \$24,000 2012 sale topper G18. I love the maternal quality of the pregnancy in utero; 24J, Crusader, 469, Highlander, Woody W100, with Henry VIII & Megaforce further back - serious pedigree depth for students of Angus bloodlines.

PTIC to MM Proceed L237. Scanner estimates natural service date circa 22/5/17. The genetic match ups to produce these M heifers will be exciting for students of the breed. We have researched incredibly thoroughly in recent times, and consider the new lines to be a significant advancement over their forebears across all aspects of the breeding equation. Here M2 presents the most logical of match ups with Hallmark on Reality. These genetics are quite unique given the very limited availability of Hallmark semen until now. The mating with L237 adds another layer of excellence.

PTIC to MM Proceed L237. Hand served 10/6/17. I hate loading up on a particular animal in case something goes wrong, but M4 is one of the best animals we have ever bred. She is a magnificent specimen from all angles. Her mother is a massive volume donor cow with a good record. To date she has earned \$7350 in embryo sales. Her three sons have been rock solid, averaging \$12,000. Her 1st daughter sells in this sale at Lot 120 and is a very impressive animal, with another daughter at Lot 74 and an excellent heifer in next. The maternal strength of the M4 pedigree is superb: Hector x Carbine x Woody W100 x Hingaia 469 - it is exotic and outcross, but they are proven cow lines over many years. On the numeric side of things, save for some improvement in the IMF number, it is a beautifully balanced set of EBVs. Finally, against recent convention at Millah Murrah, we flushed M4 once as a maiden for six A grade embryos (with three pregnant recipients safely stored away). So we know she can handle ET. Phenotypically M4 is superb. She oozes personality, with a magnificent strong, but very feminine head. She has a lovely disposition. Her body composition and structure is A1, her butt profile is amazing. All who have seen M4 have been noticeably taken with her. It is exciting to produce an animal of this calibre.

PTIC to EF Commando 1366. AI date 10/6/17. Maternal sister to the previous Lot. We snuck her in for a quick flush as a maiden too, just to keep M4 happy. It was not to much avail, but we do have one pregnancy tucked away. M121 is a deep, stylish female, with terrific pedigree background. The sires on the next line of pedigree are: Woody W100, Hazeldean Renaissance, Innesdale Stockman S27 (by 2164) and Hingaia 469. I probably get a bit hung up on pedigrees, but it is amazing how often the cream rises from the same background.

PTIC to MM Klooney K42. AI date 26/4/17. M4 & M121 surely are tough acts to follow, but M6 is right up there among the best we can breed too. She is a super stylish heifer; long and deep, with ample growth, terrific fleshing and structure. I just love the pedigree M6 carries. Like M4, it is quite divergent from the mainstream with Hingaia 469, Apollo and Crusader of Stern in the most recent lines. The data side is exceptional and the mating to Klooney is chock full of potential. A seriously hot prospect here.

PTIC to EF Commando 1366. AI date 26/4/17. Another brilliant mating. Rather than relying on word of mouth and heresy, taking the time to inspect every sire option is proving so invaluable to us. Not only do we work out what is suitable for our programme, just as importantly we gain an understanding of how best to apply the bull to our programme. Commando is a case in point. He needs to be used on females with a bit more frame, and he will throw in all the fleshing and softness in the world. I would say we have it spot on again here. This is a massive volume heifer from Jackpot whose sons were red hot at the bull sale last month. 10 sold to \$32,000 to average \$17,000.

PTIC to EF Commando 1366. AI date 26/4/17. It is hard to imagine a more easy doing cow than the dam of M70. No matter the conditions, she is always in 5 score condition. It is no surprise with the Highlander x Crusader of Stern pedigree. Her only son made \$9000 in 2014. Another chance to access the Hallmark line here, with a perfect genetic combination in utero.

Purchaser:..... \$.....

PTIC to MM Proceed L237. Scanner estimates natural service date circa 22/5/17. The dam of this heifer is an outstanding powerful cow that sells at Lot 123. Her only son to date made \$16,000 last year and her natural calf by Kruse Time, weaned in August, was one of the standout calves of the group. The grand dam is the cover girl for this catalogue, selling at Lot 109. The sire, J219 stands at Seaforth Angus and is transmitting alot of power to his progeny. A strong mating to Proceed, giving a good representation of the next phase of the Millah Murrah programme.

PTIC to LD Capitalist 316. AI date 19/5/17. The Jupiter sons were red hot at our bull sale last month, eight selling @ \$17,250. That result was with good reason. They exhibit such massive fleshing and depth of body in a sound structural package, with rock solid EBVs. The daughters are equally exciting. M7 is a great example and a very exciting breeding prospect. She descends directly from the grand matron Flower G20, through Y141 and the \$17,000 Crusader cow C69. The Capitalist pregnancy is the cream on top. The owner of this unit will be at the frontier, with the very best in modern, balanced Angus bloodlines.

PTIC to Baldrige Command C036. AI date 26/4/17. The dam of M31, Prue K27 - who sells at Lot 131 - is only a smallish framed young cow, but one I really like, and who we have flushed several times. Her Mum is breeding very well for us, having produced the \$28,000 calving reference sire Lincoln L119, owned by Tivoli Angus. We flushed her too for the 1st time in the Autumn. Phenotypically K27 is the ideal style of cow to complement the massive capacity and power of Kingdom, and the mating has borne a lovely moderate, feminine heifer here.

PTIC to LD Capitalist 316. AI date 26/4/17. A smart stretch of three full sisters here, with identical pregnancies and identical AI dates. They had three full brothers in the sale in September. They were an excellent set of bulls, displaying quite extraordinary fleshing and body shape. They sold to average \$13,334. What I love about the pedigree of these heifers is the stacking of two wonderful maternal lines, which has brought out the very best in Regent...continued at Lot 208

PTIC to MM Lincoln L119. AI date 19/5/17. I love the type and consistency that Hector produces. There is so much fleshing, softness and doing ability in his offspring as was evident when his nine sons sold to average almost \$19,000, with tops of \$30 & \$40,000 at our sale last month. A maternal sister to M66 sells at Lot 163. The Complement L119 bull will inject further style and some scale to the equation.

PTIC to LD Capitalist 316. AI date 20/5/17. Terrific style and presence in this heifer. The only son from the dam sold for \$12,000 last year. These will be among the 1st Capitalist calves born in Australia. Capitalist is one of the most talked about bulls from the US in years, and with good reason. He is a moderate framed bull with a magnificent pattern and structure. I saw him working a mob of cows earlier this year and he oozed sire appeal. Capitalist semen supplies to Australia have dried up at time of writing. The progeny will be in red hot demand in a couple of years. Kingdom daughters are the perfect type to complement him.

PTIC to EF Commando 1366. AI date 10/6/17. Beautiful feminine type from a cow who is really putting some runs on the board. The 1st H62 calf is a Reality female I regard very highly that has been used in our donor programme. She sells at Lot 131. Her 2nd calf sold to Tivoli Angus for \$28,000 in 2016 and is the calving reference sire for a number of females in this sale, Lincoln L119. His calves are stunning. This is the 3rd calf for H62, and she is a real prospect. The Commando mating is ideal.

PTIC to MM Proceed L237. Scanner estimates natural service date circa 22/5/17. The Jupiter sons were tremendously popular at our bull sale last month, topping at \$36,000 to the renowned herd of Dr Una Denham at Tingha. Jupiter puts so much depth and body mass into his progeny. The dam of M92 is similarly massively made in the true sense of the word. Her body capacity and fleshing is incredible. As a cow, we expect M92 to exhibit the same phenotype. She is a serious donor prospect descended from the legendary Flower G20/S110 line.

PTIC to EF Commando 1366. AI date 26/4/17. Superb pedigree behind this heifer. The dam sells at Lot 133 and has been a strong contributor to our ET programme, with plenty of eggs and pregnancies retained. She in turn comes from the dam of Loch Up, H49 who we so sadly lost in an ET accident. H49 was considered by some good judges to be the pick of her entire heifer drop, which included Prue H4, the dam of Klooney. The next line back is E64, who is breeding well for Henri Deans in SA, and counts a Stud sire to Mandayen Angus among her credits. This is all backed by the grand matron Brenda Y33. It is a powerful mix for Kingdom to come into and the result is a heifer with a sublime phenotype. Commando on top of all this could produce anything!

PTIC to Baldrige Command C036. AI date 19/5/17. M130 comes from a beautifully made Time On daughter from the Brenda Y33 line. Her two sons to date have sold for \$8000 & \$9000. The Hector heifers are feminine and correct and present a quality alternate pedigree. Bringing in Complement, Styles Upgrade and Hoover dam via the joining sire Command is a very promising maternal combination.

PTIC to EF Commando 1366. AI date 26/4/17. The Jester bulls in our recent sale were extremely well received, six of them averaging \$14,333. When I saw the quality of his dam, the Bangadang Lowan A61 cow, it was the first time I have been drawn to the Regent line. M13 carries an excellent maternal background descended from the matriarch Flower cows S110 and G20. The little bit of extra frame she inherits from G25, will gel perfectly with Commando, who impressed me so much on inspection in September last year.

PTIC to Coonamble Hector H249. AI date 19/5/17. The best of the latest high performance EBV bloodlines here and a logical mating of Complement on Emperor to produce M17. She is one of a mass of direct descendants of the amazing Henry VIII cow Brenda Y33. M17 provided the ideal opportunity to bring in the Hector bloodline that is so phenotypically pleasing. Our breeding approach has always been to find the bull we like, then consider the EBVs and work out a way to use him in the herd. By comparison to herds that operate with EBVs as the 1st barrier to entry, we are afforded so many more options when it comes to selecting on type. We think it shows in the physical quality and evenness of the herd.

PTIC to Baldrige Command C036. AI date 26/4/17. Heart of the herd stuff here. The dam of this heifer, F102 is a real favourite of mine. She is only a small cow in stature, but she is big when it comes to the quality of progeny she generates. She sells at Lot 111. The full brother to M44 sold for \$20,000 to Inglebrae Farms at Tenterfield last year. M44 will be an outstanding breeder.

Purchaser:..... \$.....

PTIC to MM Loch Up L133. AI date 26/4/17. A beautiful heifer from one of the outstanding cows in her year. J33 is a massive volume cow, with strong structure and pedigree background and a certain future in our donor programme. She comes from the excellent Prue E16, who was the \$13,000 Lot 1 cow at our 2013 sale. J33 has another daughter in this sale at Lot 142. Marvellous prospect in utero. Loch Up has proven himself this spring as a terrific calving ease sire and will punch plenty of thickness and weight gaining ability into his calves as they mature.

- F226 has been the lynch pin for the burgeoning Womboramurra Sim Angus programme for several years. His maternal credentials are without peer. The sire 24J needs no introduction, having carried the moniker of "cow maker" for years. The dam is one of the nearest to perfect animals we have ever bred. She sold as a dry cow in 2013 for \$24,000 to Witherswood. The grand dam is a name that appears relentlessly in our catalogues, as one of the great matriarchs in Millah Murrah's 50 years. The #1 ambition of our programme is to breed the best cows. We couldn't resist F226. His EBVs are not brilliant (nor are they that bad). We used him on cows that balance out the shortcomings and expect some excellent outcomes. There are only a handful of calves at foot in the sale.

- Dimity and I saw Commando last year as a five year old bull on centre in Montana. He is a far more appealing bull in the flesh than in the photos. He is a real true to Angus type bull in a smaller frame, on par with Reality. We have enjoyed the impact of his sire in our herd and twigged to the fact that Commando has been breeding very well in the US. Commando has been an easy fit into our programme. The early calves this spring already show a good deal of expression over the loin. I am especially excited to see what Commando produces with Kingdom's daughters. Phenotypically it looks like an inspired pairing.

- Hector carries an alternate genetic line that delivers an excellent phenotype. His progeny are beautifully quiet animals, with added thickness. We are expecting big things from his daughters. Nine of his sons sold to a top of \$40,000 and an average of \$18,667 last month. There is more discussion of Hector early in the catalogue.

- I discuss Hallmark's merits early in the catalogue. The great bulls produce even better sons. It is no disrespect to Emperor to make this claim regarding Hallmark. One thing we all love is sires that breed with consistency. It doesn't matter if they are big or small or lean or fat, reliability is a massive asset in this job. That is the case unequivocally with Hallmark. We mate him on smaller framed cows to produce powerful progeny, with excellent structure and heaps of soft fleshing. His young daughters in this sale are among the most exciting females we have bred in sometime. There are a good number of Hallmark calves at foot as well, with so much potential. A big proportion of his sons make it to sale. We have sold 20 to average just shy of \$17,000 in the past two years

- LD Capitalist is set to be one of the most popular bulls out of the US in years, and with very good reason. I saw him walking a mob of cows in June. He has a terrific muscle pattern, strong structural make up and great sire's outlook. I felt his daughters were clearly the best of their 15 month old contemporary group of heifers at Musgrave Ranch. Moderate in frame, Capitalist should produce brilliant progeny when mated to the daughters of Kingdom, Hallmark, Jackpot and the like. The 23 pregnancies in this sale will be among the first Capitalist calves born in Australia. They will be one of the hot items at Angus bull sales in the coming years.

- The sire of Command's mother, Hoover Dam is a bull I have admired each time I have seen him. His daughters are impressive. Behind that is Styles Upgrade, a bull with a great reputation as a cow producer who was ineligible for Australia. On the top side is Commando, who Dimity and I were really taken with last year and behind him is Complement. It's a hell of a good pedigree! I saw Command recently on centre at ABS in Wisconsin. He showed the effects of being locked up on centre, but the top line muscling evident in the pictures was still apparent. Command brings a healthy data set to the table which will knit nicely with our cows.

- Kingdom is a sire to add power, frame and phenotype. His 17 sons were popular at the sale last month, never dipping below \$10,000, but it is the maternal side where we think he will make the greatest contribution. They are beautiful fronted heifers, long and deep bodied with great disposition. There is more comment on Kingdom earlier in the catalogue.

- I think Klooney will become one of the great bulls in the breed. He comes from a very special cow. The first group of Klooney bulls set the sale alight last month. Nine yearlings sold to a new Australian yearling bull record for all breeds of \$50,000, as part of an incredible \$20,222 average. The consistency of article he delivers is 2nd to none. There are so few culls. They come out the same, time and again across a phenotypic range of cows. Klooney progeny exhibit beautiful fleshing and a wonderful three dimensional balance. They are long and deep with superb fill all the way along the spine. Structurally they are spot on and they are lovely cattle to handle. Klooney is a rare thing in Stud cattle breeding, presenting a blanket mating option phenotypically, with masses of commercial appeal.

- We sold K400's dam, A204 in 2013 to Andrea Strong and her Stud manager Guy Martin from Wirrabilla Angus & Fleckvieh at Taralga. Aiming to establish a rock solid cow base, they flushed A204 to BT Right Time 24J, thus combining two of the great cow making bulls of recent times. Not knowing anything about him, I saw K400 as a weaner, standing out a mile in his paddock at a Wirrabilla open day. Guy told me the pedigree and I offered to buy the bull on the spot! Not yet registered, we were able to put K400 under the Millah Murrah prefix. K400 carries a combination of older genetics, with some clear shortcomings in his number work. However, we are focused on continually entrenching the maternal traits of our herd and that requires patience. His first progeny look terrific, with awesome thickness and super sound structure. The sons will provide an excellent calving ease, genetic alternative.

- L119 was the \$28,000 equal 3rd high selling bull at our 2016 sale to Hugh & Annie Kraefft for their Tivoli Stud at Merriwa. On balance, he was my pick of the 30 Complements in that group. His dam is doing a wonderful job for us and recently entered the ET programme. She has two excellent daughters in this sale; K27 (Lot 131), who we have flushed as well as a lovely Kingdom daughter M87 (Lot 216). The L119 calves and pregnancies on the cows in this sale are at the cutting edge of the best of modern Angus bloodlines. Without doubt there will be stud quality bulls and donor standard cows among them as they mature.

- Loch Up is set to have a big impact on the breed. He was the \$85,000 high selling Angus bull in Australia for 2016. He comes with a superb maternal background, from a female who was rated by many as the best heifer of her cohort, that included Klooney's dam H4. Behind them a couple of generations is the wonderful Brenda Y33, who has been one of the great influences in our herd over the past 15 years. The first progeny of Loch Up have been analysed and he looks like he will be an easy calving sire with grunt. He will transmit softness and thickness with structural integrity. Jim Wedge reports that Loch Up has grown into a very sound and impressive bull, the most complete Angus sire he has used. There are over 30 calves and pregnancies in this sale.

- Used as a back up sire Lord L188 will only have a couple of pregnancies and calves in the sale. We selected him as the most appealing H125 son when they were yearlings. His dam is a very attractive Docklands cow who sells as Lot 93.

- I saw L237's father in 2014 in the US. You couldn't call him an oil painting, but as the highest marbling bull in America, I could see enough in him to try a small sample and see what we might turn up. The experiment was well worth it. As well as L237, there are a couple of really attractive 1st calving daughters in the sale and we sold a beautiful yearling bull last year. L237 comes from the excellent Emperor daughter who sells in this sale at Lot 99. She in turn descends from a very deep maternal lineage from G20 and Y141 down through the wonderful Crusader cow C69. L237 is a soundly made bull with very expressive muscle pattern. I selected him as the sire when I flushed the star maiden heifer at Lot 181, Prue M4. He is an exciting prospect.

- Highlander L262 is an awesome sire to view. He is deep and thick, with superb head carriage and locomotion. He sold to the renowned JS Grazing herd at Injune last month for \$22,000, as the 976kg top weight bull in the sale. This after backing up AI as a yearling and again at 18 months. He combines some wonderfully well proven cattle in his background with Highlander, Woody W100, Henry VIII and the prolific Abigail Y116 behind him. Only a couple of Lots with his pregnancies will sell.
