www.millahmurrah.com
info@millahmurrah.com

WELCOME TO THIS SPECIAL SALE OF ELITE ANGUS BREEDERS.

The offering in this catalogue represents a true sharing of the herd, with access to the very best we own. We have opened the cow herd right up, to the extent that **what sells today is every bit as good as what we retain.**

The sale features over 140, two to three-year-old, R and S drop females - siblings to our world record breaking bull drafts of 2021 and 2022.

It also contains over 30 mature M and N drop cows. Aged six and seven years, they are the force behind those record results. Many are donor cows, offered in the prime of their life, with well over \$3 million in collective progeny earnings.

Over 100 of the cows sell open, with a 2023 born calf at side. None have been flushed since calving. All sell primed for ET work or natural joining at the completion of the sale.

75 females sell PTIC to calve in Spring. All pregnancies have been sexed and aged to AI dates. For buyers there is no doubt about the article for sale.

Like their mothers, the calves at foot and pregnancies in this sale result from breeding

decisions, based on relentless first-hand research of the Angus breed worldwide. Their pedigree combinations and predicted EBV profiles are exceptional. Dozens of the progeny would normally sell at the top end of our bull sales and no doubt there are future AI sires among them.

In the 12 years since 2011, Millah Murrah bull sales have broken the breed average price record eight times. This has included four new benchmarks for the entire Australian beef industry. The record price for an Angus bull has been raised three times in the process.

The sisters, and many of the dams of these bulls, are the animals that sell - and there's plenty of them.

Whether you are in the mainstream bull supply business, just starting out, or simply want to breed a few bulls for your own commercial herd, this is an extraordinary opportunity that should not be missed.

Please join us on sale eve from 3pm to inspect the cattle, and again from 6.30am sale day. Food and refreshments will be available. Breakfast will be served on sale morning, and lunch during the day.

Ross & Dimity Thompson and Trent Walker and families.

STUD FEMALE SALE

at "Goonamurrah", 1202 Turondale Road, Bathurst

11am, Thursday 20th April, 2023

(NB from 10:30am cows will be moving to the pen up yards)

175 Registered Females

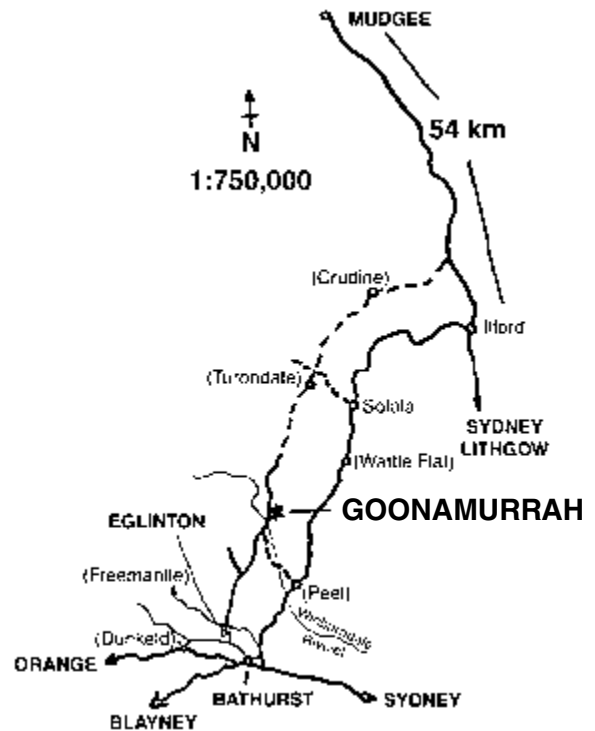

**INSPECTION FROM 3PM TO 6PM, WEDNESDAY 19TH APRIL
AND FROM 6.30AM ON SALE MORNING**

COMING FROM BATHURST

Follow Durham Street, past All Saints College, to Eglinton. From Eglinton, take the Hill End via Turondale Road, for 20 km, "Goonamurrah" is well signed on the right hand side.

COMING FROM MUDGEES

Take the Sydney Road. At Ilford turn right on the Bathurst road. About 28kms from Ilford you will cross the Turon River at Sofala. Once over the bridge, take the road to the right towards Hill End. Follow this winding sealed road for about 5-10km, until you come to an old tin shed on your left and a left turn to Bathurst. Travel about 25kms along this road towards Bathurst. You will cross Millah Murrah creek and about three kms later, "Goonamurrah" is on the left hand side.

MILLAH MURRAH ANGUS

SALE DATE AND PRIOR INSPECTION TIME:

Selling will commence at 11am on Thursday 20th April 2023. Undercover seating facilities are provided but please bring clothes for cold and inclement weather. Sale cattle may be inspected between 3pm and 6pm the evening before the sale (Wednesday 19th April) and from 6.30am on sale day.

SELLING SYSTEM

Sale of animals will be conducted under normal auction conditions using the bid card system of identification. Buyers must register with the selling agents prior to sale commencement, to obtain a bid card. This can be done at the venue, or by pre-registering online at www.millahmurrah.com or as outlined in the form at the back of the catalogue. All cattle are sold exclusive of GST. Successful purchasers are requested to give written cattle transport instructions to the selling agents at the conclusion of the sale.

ONLINE BIDDING

The sale will be livestreamed through ELITE LIVESTOCK AUCTIONS (ELA).

See opposite page for details on how to register for online bidding.

PHONE BIDDING

Sale day landline number is 02 6337 1157. Mobile service is strong at the venue. Agents' and owners' phone numbers are listed on the preceding page.

DELIVERY

Delivery is the responsibility of the purchaser. Purchasers are requested to arrange delivery within one week of the sale. Stephen Smith of Dick Smith Transport Dubbo, will be at the sale and will be co-ordinating transport. Please speak with Stephen or David Simpson of Elders regarding your transport intentions at the sale's conclusion. It is imperative that clear instructions are given right away. Stephen's contact details are as follows; telephone number - 0428 636 236, Office - 02 6882 2463, Email - dst@bigpond.com

We highly recommend Dick Smith Transport Dubbo for the safe and reliable delivery of your new animals.

REGISTRATION TRANSFER

Buyers must supply their PIC number and Angus Society Herd ID to allow Millah Murrah to transfer the animals to their new owner.

HERD HEALTH & MANAGEMENT

Millah Murrah cattle are rated JBAS-8 and free to travel anywhere in Australia.

Pestivirus: All animals are up to date with Pestigard. Cows with calves at foot were treated with a booster in March. PTIC females were treated in September.

We aim to use as few drugs as possible on our cow herd. It is prudent to introduce purchased cattle to the herd health regime of their new home as soon as is practical.

No animal has had its feet trimmed in any way.

The cattle are used to being handled on foot, with ATV's and utilities and horses. All cattle at Millah Murrah are rigorously screened for temperament. However, this is no guarantee that they will behave on sale day. This is particularly so for cows with calves.

HEALTH AND SAFETY OF VISITORS

Visitors enter the pens at their own risk and are advised to carry a piece of the poly pipe provided. Children under 16, frail and elderly people are requested not to enter the pens. People with mobility aids should not enter the pens.

All the cows are known to be of placid temperament under normal conditions. However, sale day is not "normal conditions"

Suckling cows, especially, present a very real threat to human safety, and visitors need to be alert for an overprotective mother becoming aggressive.

If you enter the pens, take note of your surrounds. Be conscious of where you can seek safety, such as the hay racks.

Do not loiter in the pens. We cannot cover every example of the dangers presented by the cattle. Use common sense and always be alert.

If you feel threatened whatsoever, please do not act hardy. Do what is necessary to ensure the safety of yourself, and other people, in the pen.

We don't expect problems, but it is critical that visitors pay attention to the dangers associated with the day.

RECESSIVE GENETIC CONDITIONS:

All animals are free by test or pedigree from AM, CA, DD & NH.

SPECIAL TERMS FOR LOTS 11, 12 & 39:

Please note special terms of sale for these three Lots.

For Lots 12 & 39, the terms are self-explanatory according to the notes under their Lot details.

Regarding Lot 11. The cow and calf remain the property of the vendor. A minimum of 20 A grade embryos is guaranteed to the buyer within 12 months of sale.

Sharing of embryos can be undertaken either by

- Alternating flush ownership or
- Sharing the embryos produced from each flush.

Under option (a) all costs of production are borne by the party receiving the embryos.

Under option (b), Millah Murrah reserves the right to choose the donor sire for the flush programme and all costs of production are shared between the purchaser and the vendor.

Flower & her calf will remain at "Goonamurrah" until weaning. She will be flushed by David Christie on a regular rotation of four two six weeks. Upon weaning of the calf, we would consider sending Flower to an embryo centre.

Should it be necessary to mate Flower naturally, this will be undertaken at "Goonamurrah" and the natural progeny will remain the property of the vendor. Once she has calved down we would endeavour to return her to ET work.

SEMEN RIGHTS

100% of semen rights transfer to the buyer on all male calves in the sale. Millah Murrah reserves the right to collect up to 500 doses of semen at cost, from any animal in the sale, at buyers convenience. Semen to be used within the herds of the Thompson and Walker families only. This relates to live calves only at Lots 1 – 102.

HOW TO REGISTER with

ELITE LIVESTOCK AUCTIONS

Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device.

Click on the **"Sign Up"** page / link

Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer)

Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue

Click **"Register"**

You will then be notified by email that an account has been created.

Once an account has been created you are all **"Set to Bid"**

Each Auction can then be viewed by clicking **"Live Auction"** logo on the Elite Livestock Auctions website.

Once you receive email notification that your account has been created please go to the sale you wish to bid at and click **"Request to Bid"**

The sale will then approve your application to bid and on the sale catalogue you will see **"✓ Bid Request Approved"**

On Sale day simply login, click **"Enter Auction"** on the catalogue page and you can start bidding.
(There is no need for software download)

At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

TO WHOM IT MAY CONCERN

This is to certify that on the 19/12/2022 & 02/02/2023 at the request of Mr. & Mrs. R. & D. Thompson, Millah Murrah Angus of “Goonamurrah”, Bathurst, NSW, I pregnancy tested and determined foetal gender (aided by ultrasound technology) the cattle identified below. They were also re-confirmed pregnant on the 01/03/2023.

IDENTIFICATION:

74 x registered Angus females.

STAGE OF PREGNANCY:

These 74 females were confirmed to be pregnant, and had foetal gender determined on 19/12/2022 and 02/02/2023. All 74 females were again confirmed pregnant on 01/03/2023.

Their individual estimated calving date and foetal gender information is as per the Millah Murrah Angus sale catalogue.

Please note: Foetal sexing by ultrasound is over 98% accurate.

Yours faithfully,

Dr. Shane Thomson BVetBio. BVSc. MAnSc.

For HOLBROOK VETERINARY CENTRE

Our services at HVC include:

- ✓ Purpose built donor centre for embryo production
- ✓ Contract ET recipient herd
- ✓ Comprehensive on-farm ET & AI program service
- ✓ Pregnancy scanning (including foetal sexing)
- ✓ Bull fertility testing
- ✓ Disease management programs

HISTORY & HIGHLIGHTS

In 1969 Wyatt & Winsome Thompson commenced the Millah Murrah Angus Stud with foundation females from the renowned Wallah herd, at Narrabri.

Six cows were purchased from the Flower, Abigail and Prudence families. The Ela, Rado & Brenda families were added soon after, from Muskerry and Glengowan herds.

Additional female lines were added, but fell by the wayside, over the ensuing 54 years. Today, almost every cow in the herd stems from these original 10 foundation animals.

1972 Sydney Royal Easter Show; Millah Murrah Naquire with Wyatt Thompson on the halter in 6th position.

Millah Murrah cattle were exhibited at local and Royal Shows for 20 years from the early 1970's. The highlight came at Sydney Show in 1989, when Millah Murrah E13 was awarded Supreme Angus Exhibit.

1989 Sydney Royal Easter Show; Supreme Angus Exhibit, Millah Murrah E13, sashed by Mrs George Georges, with Judge Charles Bott, Naranghi Angus & Ross Thompson on the halter.

We also competed in Hoof & Hook competitions, winning five champion ribbons and supplying eight Stan Hill representatives to Angus teams that regularly won at Sydney Show during the 1990's. In 1997 we achieved the rare feat of all three steers selected for the Angus Stan Hill team being sired by Millah Murrah bulls. This achievement was equaled in 2009, by Brian Brooker, when three Main Camp steers were selected as the Angus Stan Hill team. Incredibly they were all by Millah Murrah bulls.

Oberon Show C. 1973, Sue Howieson (nee Muston), Tom Gordon, Ross & Wyatt Thompson.

Paul Chapman, Wyatt Thompson, John Fryer (gavel) and Mike Wilson C. 1991.

1986 Castle Hill Show; Wyatt and Jane Thompson with Millah Murrah Dalbert D11.

Wyatt Thompson, bull sale 2011

HISTORY & HIGHLIGHTS

In 1988, we conducted our first on-property bull sale. These have continued annually ever since, with occasional auctions of commercial and Stud females.

Sale highlights include:

- 2000: Australian record price for commercial Angus breeders (\$2300 each for 10 four-year-old cows & calves)
- 2001: NSW record average price for an Angus bull sale (64 bulls @ \$6500)
- 2001: Australian record price for commercial beef breeders of any breed (\$2700 each for 10 two-year-old heifers & calves)
- 2003: Australian record for an Angus bull sold at auction (\$41,000 for Woody W100)
- 2003: Australian record for an Angus cow sold at auction (\$34,000 for Brenda U7)
- 2005: Australian record price for commercial beef breeders of any breed (\$3400 each for 11 four-year-old cows & calves)
- 2011: Australian record average price for an Angus bull sale (80 bulls @ \$8850)
- 2013: Australian record average price for a cow sale of any breed (112 @ \$7960)
- 2014: Australian record average price for an Angus bull sale (95 @ \$9147). Highest priced Angus bull in Australia for the year (Hercules H250 @ \$70,000).
- 2015: Australian record average price for an Angus bull sale (105 @ \$14,896). Australian record price for an Angus bull, (Kingdom K35 - \$150,000).
- 2016: Australian record average price for a bull sale of any breed (109 @ \$16,348). Highest priced Angus bull in Australia for the year, (Loch Up L133 - \$85,000).
- 2017: All breeds highest bull sale average for the year, (122 @ \$15,590).
- 2017: Australasian all breeds record female sale average, (234 @ \$13,709). Australasian all breeds record priced female (Prue M4 - \$190,000).
- 2018: All breeds highest bull sale average for the year (102 @ \$15,843), All breeds record priced yearling (Nugget N266 - \$54,000). Five highest selling Angus bulls of the year.
- 2019: Australian record Angus bull sale average, (69 @ \$17,261). Australian record priced Angus bull (Paratrooper P15 - \$160,000).

- 2020: Australian record Angus bull sale average, (78 @ \$20,834).
- 2021: All breeds world record bull sale average > 100 head, (118 @ \$34,221). Australian record priced Angus bull (Rocketman R38 - \$280,000). 2nd highest priced Angus bull in history (Rembrandt R48 - \$240,000).
- 2022: All breeds world record bull sale average > 100 head, (128 @ \$43,633)

In 2003, the year Dimity and Ross were married, as part of family succession, we sold all the stud cows, retaining just 75 weaner heifers and a hand full of recipients. This formed the nucleus for the stud today.

In 2018 Trent Walker purchased equity in the herd. Today the Millah Murrah breeding herd is run at Lameroo in South Australia, and "Goonamurrah", north of Bathurst.

Information about our herd and the animals in this sale:

BREEDING PRINCIPLES

The type of animal we strive to breed can be described with one word: Dimension. Our cattle are long, deep, and wide.

Millah Murrah cattle weigh heavy at a young age, calve down and rebreed easily, and thrive in drought conditions. These doing ease traits have been the key to profitable cattle production in Australia since 1788. They are the core values we embrace.

We have always borne the end-product in mind, selecting for key phenotypic indicators of meat quality and yield; expressive top line muscling, easy finishing ability, and fine skin and hair type.

We view Angus very much as the all-rounder of the industry. Renowned for its eating quality, Angus is the principle maternal breed in temperate regions around the globe. At breeding time, our focus is always to consider the phenotype outcome first – what will this animal look like as a brood cow? The bulls we produce, and our customers' market topping calves, derive from this approach.

DESIGNING THE HERD

Over 80% of bull calves born see active service in the field.

This high rate is brought about by exhaustive research into the global Angus gene pool. Since 2011, I have inspected every sire that has entered the herd. Eight trips to the US, 12 trips to NZ and endless travel across Australia over the past 20 years has been the highlight of this wonderful profession. No one gets it right every time, but unquestionably we have lowered the "error rate" of our genetic pairings. The greatest benefit has been identifying the sires that we preclude.

Seeing potential sires first-hand, generally results in one of three decisions:

- (a) don't like the bull
- (b) like the bull, but he doesn't fit what we need at that point in time,
- (c) like the bull and can make a judgement on how best to use him in the herd.

In many cases the inspection goes much deeper than just seeing the bull in the paddock or on centre. More often than not, we will visit the herd from where the bull came. The subsequent increase in intellectual property is a huge benefit.

With such knowledge, the pregnancies and calves in this offering are superbly designed. It is attention to phenotype detail, paired with pragmatic use of Breedplan that sets our programme apart.

APPROACH TO BREEDPLAN

Millah Murrah has been a disciplined participant in Breedplan for close to 40 years. It is a terrific aid in breeding. However, "endless horizon" pursuit of fancy numbers, often at the expense of phenotype, has not improved the efficacy of the breed. We use EBV's as they were intended, as guideposts for genetic selection, not as a goal in themselves. We find a sire which suits us on type and then examine the figures. We then seek a way to introduce that animal into the herd, with cows that are likely to balance out the objective shortcomings.

As a rule of thumb, our general position with EBV's is to keep abreast of the breed average, or a little ahead, for as many traits as possible. In this fashion, we have always felt that objectively, Millah Murrah cattle represent the breed as it sits at that time. In graphic terms, we feel the optimal data set sees all traits hovering around the centre line. If we can find an animal that fits on phenotype, shows balance across the suite of traits, and shows excellence in specific areas, all the better.

We are happy to leave other breeds to take their place in the market, in their areas of strength. Our firm belief is that the Angus role is as the industry's great all-rounder and provider of the mother cow. So much of this depends on the physical makeup of the animal.

PEDIGREE ASSURANCE

We have been routinely DNA parent verifying every retained female since 2003. No one has ever challenged our claim that Millah Murrah has the longest record of DNA pedigree proof, of any major cattle Stud in the world.

We have taken a sample from every calf in the sale and have already submitted them for parent verification and single step TACE analysis. We recommend that purchasers of the pregnant females do the same when their calves are born next Spring.

DISCLAIMER:

Regarding the parentage of the calves at side and pregnancies in utero: Every endeavour has been made regarding the accuracy of the pedigrees of the calves and pregnancies in this sale. In the case of an error in the parentage described, provided we can ascertain the correct pedigree of the calf, Millah Murrah does not assume any responsibility for the error. In the unlikely event that a calf cannot be verified to any parentage, Millah Murrah will refund 1/3 of the purchase price of the Lot in question.

READING THE CATALOGUE

Detailed information is provided for the cow and its calf, or pregnancy at each Lot. We submitted as much calf information as we could before cut-off deadlines. EBV's are printed for those calves that beat the deadline. Expected Average Progeny Values are shown for all other calves, and pregnancies in utero.

FINE TUNING THE COW HERD

We assess our cows continually and cull without fear or favour. Culling includes so many factors, and the level of ruthlessness is what sets the best herds apart. The assessment schedule takes the following approximate course:

- Assessment at weaning
- Pregnancy testing
- Calving
- Assessment before rebreeding, including calf quality
- Pregnancy testing
- Calving – and so on

This is not to mention genetic defect carriers, EBV's, deaths - the list goes on. It is a Stud breeder's role to prune without emotion.

Approximately every five years however, the culling becomes so effective that it is possible to offer females from the core of the herd.

It is a curious thing, why in this country it is uncommon for an Angus Stud to sell breeding females except in dispersal situations. This is not the case in other countries like the USA where the high-profile herds conduct cow sales regularly.

We are extremely proud of our role as Australia's leading source of Stud Angus females for the past two decades. So many of the successful modern Angus studs across the country can trace their beginnings to our sales.

CALVING AND REBREEDING

EVERY ANIMAL IN THE SALE WAS BORN UNASSISTED.

The calving record of each breeding age female stands up to scrutiny.

PREGNANCY TESTING

Please see page 4 for veterinary certification of the pregnancy test results.

Shane Thompson from Holbrook Vet Centre visited three times to ensure accurate identification of the foetus gender for each pregnant Lot.

All but two animals are pregnant to an AI date and the two pregnancies to natural mating have been accurately aged.

All animals were retested on March 1st, nine weeks after the last AI date.

While errors are possible, buyers could not have more surety about what they are purchasing.

We have done everything possible to ensure delivery of a live calf. Whilst not liable, in the unlikely event that things don't eventuate as described, do let us know.

KEY REFERENCE SIRES

MILLAH MURRAH KINGDOM K35

Kingdom was the \$150,000 former record priced bull of the breed. Into his 10th year, he resides with the Shaw family at Injune in Central QLD. Scores of his daughters form the foundation of the JS Grazing herd, one of the best known commercial Angus programmes in the country. He is the product of two legendary cow makers, being sired by Hingaia 469, with a BT Right Time 24J dam. In our own herd we rate the Kingdom females every bit as highly as Klooney's daughters. Kingdom influenced cattle have achieved many sale highlights. A son broke the 27-year-old APR record at our 2017 sale. That mark was raised by a maternal grandson at the same event in 2021. The superb ABS semen sire Rembrandt R48, who fetched \$240,000 in 2021, is also from a Kingdom dam. 26 bulls from Kingdom dams have sold here in the past two years to average an astonishing \$45,692. Measured by his daughters' bull sales, he owns one of the best maternal records the breed has seen.

Kingdom K35 at 18 months

MILLAH MURRAH KLOONEY K42

The product of Booroomooka Theo and the fabulous Te Mania Emperor daughter, Prue H4, Klooney was the \$80,000 2nd high seller from our 2015 sale. At the time he was the 5th highest selling bull in breed history. Klooney daughters are amazing mothers, and pivotal contributors to the extraordinary consistency of our cattle. Now rising 10 years of age, Klooney is in peak health and still serving paddock duties at Cherylton Angus in WA. 38 bulls from Klooney dams have averaged an incredible \$44,711 at our past two bull sales. We receive excited Klooney progeny reports from all over the world. Klooney has earned his reputation as one of the great modern day maternal bulls. He is a legend of the breed.

Klooney aged 5

MILLAH MURRAH LOCH UP L133

Loch Up was the \$85,000 high selling bull of the breed in 2016 to ABS and Ascot Angus. A descendant of the great Brenda Y33, Loch Up is the first calf of a lovely Emperor heifer, with US sire Thomas Up River as dad. With several high performing daughters, in our P drop especially, Loch Up has become a serious maternal force. His daughters' records stack up with the very best. At our most recent sale, Ascot joined forces with JT Angus to purchase a Loch Up grandson, Sugar Ray S76 for \$160,000 to top the sale. That is the headline of a sales log that has seen 27 bulls from Loch Up daughters average a phenomenal \$42,444. These numbers roll out like they are commonplace. They are not. The bull sale records of Loch Up, Klooney and Kingdom daughters are beyond comparison, anywhere in the world, and confirm their amazing potency as maternal sires.

Loch Up L133 at 20 months

COONAMBLE HECTOR H249

Hector is highly regarded across Australia for the excellent skeletal structure and udder quality of his daughters. They are magnificent, powerful brood cows. Hector is a product of US sire KCF Bennett Performer and a daughter of the legendary West Australian cow, Bangadang Lowan A61. Hector will forever hold a prominent position in our herd's history, as the sire of Prue M4. She broke the Australasian record for an Angus animal, selling for \$190,000 at our 2017 female sale. There are several of Prue's paternal sisters from the same year group in this sale. They are outstanding examples of the breed. A Hector maternal grandson hit the headlines in 2021, when Heart Angus purchased Rolls Royce R275 for a then all breeds record yearling price of \$110,000. In any other company the sales records of Hector's daughters would be astounding. 30 maternal grandsons have sold to average \$37,467 at our past two sales.

Coonamble Hector aged 7 (taken by David Jerram)

Prue M4 in production for Rodger Pryce at Brooklana

MILLAH MURRAH NECTAR N334

Nectar was the youngest bull at our 2018 sale and fetched \$40,000 to Heart Angus. In the foreword to the Heart Angus 2022 bull sale, Chris Paterson wrote of Nectar, "...excels in structure, doing ability and phenotype. His females are very impressive, continuing to be standouts in the herd." A Coonamble Hector son, Nectar comes from a beautiful cow in Prue H113. Prue was the first Australian Angus cow to produce three sons to sell for \$40,000 or more. Her pedigree sees the great cow maker Ythanbrae Henry VIII coupled with a daughter of another great maternal influence, NZ sire Crusader of Stern. We have used two Nectar sons widely in the herd. Nectar daughters exhibit next level fleshing and capacity, with spectacular examples in the three-year-old cow/calf section of the sale.

Nectar aged 12 months

MILLAH MURRAH QUIXOTE Q96

Quixote is a son of Spickler Chisum 255, from a Klooney dam, the highly fancied Brenda N8. The \$60,000 2020 sale topper, Quixote has seen widespread take up as a semen sire for ABS Genus. Progeny are extremely easy doing cattle, with the first major bull cohort set to sell across the country this spring.

Quixote at 20 months

MILLAH MURRAH NUGGET N266

A product of Ascot Hallmark and a Booroomooka Theo daughter, Nugget sold for a then all breeds record yearling bull price, when he topped our 2018 sale at \$54,000. Nugget is a wonderful contributor to structural integrity, leaving moderate framed, easy doing females, with outstanding skeletal and foot conformation and strong udder design.

*Top: Nugget's dam, Honey H159

MILLAH MURRAH PARATROOPER P15

Paratrooper set a new benchmark for the breed when he sold for \$160,000 at our 2019 sale. He is an EF Commando son from a maternal line featuring many Australasian greats from modern times. Highlander of Stern, Woody W100 & Matauri Reality all appear on the bottom side of his pedigree, with Crusader of Stern and Hingaia 469 among the generations before that. Paratrooper progeny have taken the industry by storm, with sons topping sales wherever they have appeared. Among them are Rocketman and Rembrandt, the two highest selling bulls in Australian Angus history. The eight three-year-old R drop Paratrooper daughters with calves in this sale are the oldest in existence. There are some absolute gems among them, including, but certainly not limited to, Lot 34 & 35. Several of the lead pen of PTIC heifers commencing at Lot 117 are as good as we have ever produced.

Paratrooper aged 3

MILLAH MURRAH QUARTZ Q29

Quartz is something else. He stood out from his peers from a young age and never looked back. His pedigree is littered with greats from another era. The sire is K400, whose three generation paternal line features BT Right Time 24J, Crusader of Stern and Hingaia 469. The dam is by the

Booroomooka Theo sired Klooney. Something gelled in this animal. His five sons averaged \$55,000 at the last bull sale. The daughters in the 1st calving section of this sale are stellar examples of the breed.

Quartz aged 4

MILLAH MURRAH RECTOR R53

Rector R53 is a real favourite of ours and has seen heavy use here. He is moderate framed, super sound, easy doing, and with so much top line expression. An easy to fit data set is a bonus. Rector had the misfortune of selling at our 2021 sale as the middle bull of three, that featured the two highest priced bulls in breed history as the bookends, Rocketman and Rembrandt! Springwaters Angus and New Zealand's Twin Oaks kept their wits to secure a bull I think can do so much for the breed. He is a son of Nectar with an immediate ancestry comprising Ascot Hallmark, Coonamble Hector, Booroomooka Theo and Ythanbrae Henry VIII. The maternal credentials are very strong. We are seeing some special cattle coming through in our yearlings.

Rector R53 at 18 months

MILLAH MURRAH RECTOR R74

Rector R74 is a Nectar son from an excellent Klooney x LT Driven cow. He was purchased by the astute eye of Inglebrae Angus' Darren & Kelly Battistuzzi at our 2021 sale. His first calves that weaned here earlier this year, exceeded all expectations. We expect in time, R74's growth data should shift considerably to reflect that.

Rector R74 at 18 months

MILLAH MURRAH ROCKETMAN R38

The breed record priced bull, Rocketman fetched \$280,000 at our 2021 sale. A Paratrooper son from a Capitalist female, his pedigree suggests thickness. It did not miss the mark. Rocketman calves are awesome. It is hard to believe an animal could throw more meat in his progeny than Paratrooper, but Rocketman does. In the excitement after the sale, Rocketman semen was priced a little out of reach of the mainstream market. So, there are not all that many calves around...yet. You cannot miss them. Those who use Rocketman semen are in for a treat!

Rocketman at 18 months

MILLAH MURRAH REMBRANDT R48

Rembrandt sold two lots after Rocketman for the breed's 2nd highest price on record, \$240,000. It was an electric moment! Rembrandt's pedigree unites two previous record priced Angus bulls with Paratrooper and the phenomenal Kingdom dam, Abigail N60, combining. Delighted Rembrandt progeny reports are flowing in from around the country. The calves are long and thick with loads of "look at me" presence about them. A feature Lot of the sale is Rembrandt's only sister, a magnificent heifer that sells at Lot 122, PTIC to Rector!

Rembrandt at 18 months

TAIMATE ROY R38

A few learned scouts alerted me to Roy, so Dimity and I decided to take a trip to NZ when the Taimate sale was on last June. I assessed Roy at the same time. Along with Coonamble's Craig Davis, we spent a lot of time with the bull. He is as the picture suggests, thick, soft, and very easy fleshing, with an excellent disposition. The dam is the best cow in the Taimate herd. His sire, Taimate L38, comes with a great reputation, and we noted a lot of the cattle that appealed during our trip, carried the influence of his paternal grand sire, Kaharau Cobra. Roy's dam side combines Matauri Reality and Coonamble Elevator. Time will tell, but the ingredients look good. Australian semen rights are

tightly held, with semen not available on the open market. The pregnancies carried in utero are the only avenue to Roy progeny at this stage. They will be the earliest calves born in Australia.

Top: Taimate Roy (taken by Ross)
 Lower left: Roy's dam, Taimate 1506
 Lower right: Roy's sire, Taimate L38

MILWILLAH RAMJET R1029

Dimity and I share a strong friendship with Will and Tempe Caldwell. Not long after the 2021 bull selling season, paying a social visit I noticed a calf among Will's weaners that really took my eye. We didn't talk much more about cattle that day. Fast forward to August 2022, taking a run through the paddocks, there were some lighter bulls Will had used. One stood out. It was the yearling bull I had liked the year before. So, that is how Ramjet R1029 came to enter our programme. Ramjet is a Powerpoint son from one the best cows in Milwillah's herd, by Reality. On inspection he is long and balanced with everything in the right place. The Powerpoint/Reality pairing has been a successful blend at Milwillah, and with exclusive use of Ramjet semen, we eagerly await the first progeny this spring.

Ramjet aged 2

TE MANIA ULONG U41

Ulong was a bull whose progeny I admired at the turn of the century. We used him in an Argentine joint venture at the time. His maternal influence on the breed is strong, most notably through the Matauri (NZ) stable of Reality and his sons. Ulong's structural basics are strong. His data set caught my attention for the ability to marry strong Net Feed Intake and IMF in the one beast, not a common combination. We have always enjoyed revisiting strong performers from previous eras. Witness Hingaia 469, Booroomooka Theo and BT Right Time 24J, whose genetics we have

incorporated two decades after their peak. Going back to the future from time to time, circumvents the risk of heading into the genetic never never and cements our cow base for future generations.

Sons of Ulong

A fitting start to the sale with the gilt edged, heart of the herd combination of Kingdom joined with Klooney's dam Prue H4. They have produced a superb example of the Angus breed in Prue M276. Her first two sons have sold for \$75,000 & \$40,000, with a magnificent daughter selling at Lot 80. M276 raises a beautiful Rector R53 heifer calf at foot (NMM23U229), born 2/2/23. We would view her as a strong donor prospect if she remained in the herd. This is a stud establishing package of the highest rank. These M cows have seen a good deal of ET work and present in big order. They all suckle recently born calves and sell open, unflushed since calving, and ready for immediate ET programming.

Kingdom females are cows that perform and last in the herd. All five of M274's sons have sold to a top of \$26,000. A spectacular daughter sells at Lot 79. She nurses a thick Rector R53 bull calf at foot (NMM23U228), with solid data and interesting genetic diversity. He was born 2/2/23. With over 80% of our bull calves seeing paddock service duties, the calf is a high value proposition on his own, let alone with his proven dam thrown into the mix.

M293 is massive, without doubt the most powerful cow we have ever produced. She is a prolific contributor to the herd with 55 progeny recorded. 15 out of 16 breeding age daughters have been retained in our stud. She has \$442,000 in bull sales, to a top of \$110,000 paid by Heart Angus in 2021, which was an all breeds record price for a yearling bull. A structurally impeccable daughter of Hector, M293's ancestry stacks multiple generations of maternal firepower with Kelp, Henry VIII, Crusader of Stern, Hingaia 469 & Naranghi Quatic all rolled into the bottom 1/2 of the pedigree. She descends from the outstanding Abigail Y116/B10 line that features right throughout this catalogue. Six daughters sell in the pregnant heifer section of the sale, while she nurses a Rector bull calf at foot (NMM23U247), born 28/2/23.

Super type descended from the matriarch Flower G20/Y141 line. An M drop Hector daughter, Prue M4, topped our last female sale in 2017 at \$190,000 to Brooklana Angus. Hector made magnificent brood cows. M190's only joining age son to date was a twin that fetched \$12,000. A daughter sells at Lot 100, while we retain a beautiful Nugget daughter, set for ET work in 2023. Thumping Rocketman bull calf at foot (NMM23U224), born 30/1/23.

Another Hector donor cow descended from the best line of our Rado family, originating with matriarch D136. D136 was purchased by Ascot at our 2013 sale for \$9000. Still going strong, she has generated well over \$100,000 in bull sales for them. Along with her daughters, G265 and G276, she has had an enormous impact on the herd. M287 owns a pedigree stacked with generations of maternal power. Right Time 24J, Hingaia 469, Woody W100 & Glenoch Megaforce all feature in the background. M287's three sons to date have all made sale standard, topping at \$46,000 for the full brother to her current calf, while another fetched \$22,000 in 2020. Paratrooper heifer calf at foot (NMM23U225), born 1/2/23.

A favourite donor cow, with 12 progeny, M207 is descended from the grand 1997 born matriarch cow Abigail S104. M207's first calf, Abigail P152 has become a feature donor cow for us. Three other daughters sell at Lots 51, 52 & 170. Four M207 sons have sold to tops of \$30,000 & \$32,000. She is a cow we hold in very high regard. PTIC to NMMR127 - calf due 23/3/23. (Calf details will be provided at our website ahead of the sale).

A superb maternal lineage backs this female, with matriarch Flower cows G20 & S110 and Abigail S104 combined on the bottom side of the pedigree, and the famed Prue H4 on the top side. Depth of breeding is the Millah Murrah hallmark. Legendary cow makers like Woody W100, Hingaia 469, Summitcrest Powerplay, Booroomooka Theo & Klooney K42 all add weight to the maternal equation of Flower M221. She has had 17 progeny to date, with \$339,000 in bull sales to a top of \$50,000. Progeny sale records of this calibre don't show up every day. Daughters sell at Lots 38, 56, 125 & 129. Rocketman heifer calf at foot (NMM23U226), born 1/2/23.

SELLING 1/2 SHARE OF FUTURE EMBRYO PRODUCTION. PHYSICAL POSSESSION OF COW AND FULL POSSESSION OF CALF RETAINED BY MILLAH MURRAH (see page 2 for full terms). A descendant of the fabled Flower G20 & her matriarch grand daughter Y141, N30 pools together our absolute best. She is an excellent embryo producer (14 A grade eggs for nine calves at her most recent flush - conducted between natural calves without dropping out of season). Fourteen N30 embryos have sold to gross over \$40,000, with insatiable demand and more than one declined offer of \$4000 fielded in the past 12 months. N30's first son is the magnificent K400 son, Quartz Q29, who was my pick bull and the \$42,000 2nd high seller at our 2020 sale, to Innesdale Angus. Quartz has some superb daughters among the S drop females in this sale. Another son fetched \$32,000 as the youngest bull we have ever sold, with several exciting prospects for our next bull sale. Two beautiful N30 daughters sell as sale features at Lots 34 & 35. Three more daughters sell PTIC at Lots 134, 135 & 171. Rector R53 bull calf at foot (NMM23U145), born 19/2/23 is not included in the sale. A minimum of 20 embryos is guaranteed to the buyer within 12 months of sale. An incredible opportunity to fast track more than 50 years of breeding & selection in one hit.

N162 sells with the vendor retaining possession for the first two flushes post sale. The purchaser has the right to 1/2 share in costs and embryos from those programmes should they choose. 100% possession of the cow will transfer to the purchaser upon completion of the 2nd flush or October 1st 2023, whichever comes sooner. Invoicing will occur at that time. The Paratrooper bull calf at foot (NMM23U184), born 3/3/23, remains the property of the vendor. N162 has an ocean deep maternal pedigree, underscored by a double dose of Hingaia 469 and the phenomenal influence of matriarch Abigail S104. She is the youngest cow in the breed with four sons that have sold for \$40,000 or more. Structurally and phenotypically she is exquisite. She is the sort of cow that opens the door to dabble in unproven bloodlines from around the globe, with high likelihood of success. We present N162 as a feature of the offering, and believe she has the power to fast track a programme to the top. A prolific embryo producer with fantastic fertility, to date, we have not had to remove N162 from natural production. Two flushes, conducted between calves, without changing breeding season, have resulted in 35 A grade embryos. Her 1st daughter sells at Lot 99. Three full brothers to the calf at N162's side have sold for \$40,000, \$46,000 & \$54,000. Her 1st calf by Lincoln was the \$40,000 3rd high seller in 2020.

A cow with enormous capacity, N145 has had two sons to date, fetching \$30,000 & \$36,000. The older bull served stud duties at Merlewood Angus in the Victorian Gippsland. We retain a full sister to the Paratrooper calf that will accompany her. N145 carries a pedigree brimming with high performing matrons, including her grand dam Prue C48. C48 produced ET sisters Prue H112 & H113, the former record priced cow of the breed and the first Angus cow in Australia to produce three \$40,000+ sons, including Nectar N334. PTIC to Paratrooper NMMP15 - calf due 18/3/23. (Calf details will be provided at our website ahead of the sale).

Backed by Abigail S104 with some super stars of yesteryear closer up in the pedigree, N66 is one of the very best Kingdom daughters we have produced. She is an excellent donor cow with a lot of outstanding progeny coming through in the T crop. She exhibits flawless structure and phenotype and comes from a pedigree littered with maternal giants like Woody W100, Ythanbrae Henry VIII, Hingaia 469 & BT Right Time 24J. N66's only son to date sold for \$50,000 at our last bull sale. He is full brother to the Paratrooper heifer calf at side (NMM23U166), born 25/2/23. An outstanding herd foundation prospect here. One not to be missed.

Super feminine cow here, in the prime of her life, displaying the tremendous depth of quarter, supple joint angles and clean lines that we look for in an Angus female. With Abigail S104 appearing on both sides of the pedigree, and Woody W100, Hingaia 469, BT Right Time and Henry VIII all thrown together, N126 has a peerless Angus cow maker heritage. N126 has a daughter selling at Lot 30 and nurses an exciting Rocketman heifer calf (NMM23U75), born 30/1/23.

Genuine Angus royalty behind this superbly made cow. Her pedigree descends from Abigail S104, through Hingaia 469 & Crusader of Stern, with KMK Alliance as a grand sire. Add Hector at the top of the tree and it is a seriously stacked cow pedigree, illustrating two human generations of selection discipline and the extraordinary depth of our cow herd. N116's two sons have sold for \$32,000 & \$100,000. My catalogue comments on the latter bull, purchased by the Bassett family at Roma, were "S52 is pretty much as good as we can make them." He is full brother to the Paratrooper bull calf at foot (NMM23U118), born 4/2/23.

The grand matriarch Abigail S104 has had such a profound impact on the Millah Murrah herd. If you delve deep on the computer you find her behind a lovely female here. Two full brothers to the calf alongside N119 have fetched \$40,000 each. She presents as a cow possessing foundation quality phenotype and structure, with proven progeny performance once again. Paratrooper bull calf at foot (NMM23U183), born 2/3/23.

The amazing Flower cows G20 & S110 from the 1987 & 1997 calf crops appear behind so many of the best animals in our herd and here is another outstanding female from that line. N63's first calf, Q82, is set to be an ET mainstay for years. Her 2nd calf was catalogued at Lot 2, fetching \$28,000 at the first of our world record averaging bull sales in 2021. Her 3rd calf is the first calver that sells at Lot 94, with a superb grand daughter at Lot 83. Thumping Rector R53 bull calf at foot (NMM23U133), born 9/2/23.

Descended from the grand matriarch Flower G20, maternal stalwarts pack the lines of N10's pedigree. Hazeldean Rapier, Hingaia 322, Hingaia 469, Woody W100 and Booroomooka Theo all contribute to her heritage. The dam L116, sold to Coffin Creek in 2017 for \$12,000. She has produced \$150,000 in progeny sales for them. The Paratrooper bull calf at foot (NMM23U92), born 1/2/23, carries arguably the most successful genetic match up we have produced; Paratrooper x Kingdom. The full brother fetched \$40,000 at our 2021 sale. We retain an outstanding T drop full sister.

The full sister to R16 sells next. They are the first of a magnificent group of three year old females, and daughters of a massive volume cow, descended from the mighty Flower G20/S110 line. N61 has had 10 sons sell between \$20,000 & \$40,000, including Powerpoint R45, the full brother to this cow. R45 was purchased at our 2021 sale by Paratrooper's owners Arkle Farms. We have used R45 by AI, with several calves at foot in this sale. R16 suckles a cracking Rector R74 bull calf at foot (NMM23U110), born 3/2/23, with near perfect data and a superb pedigree background.

Full sister to the preceding cow. I love the bloodlines and predicted data set behind the meaty Rector R74 bull calf at foot (NMM23U84), born 31/1/23. He represents precisely the balance we want from an Angus animal in 2023, phenotypically and in objectively measured terms.

Magnificent showing standard cow. The wrench for us, selling them so young, is not seeing the cows achieve their full earning potential. R28 has a phenomenal bull calf by Ulong set for the sale in September. Despite being a heifer's calf, at 457kg on December 10th, he was the 3rd heaviest calf in his cohort of almost 100 bull calves. She nurses a lovely Rector R53 heifer calf at foot (NMM23U81), born 31/1/23. A herd foundation pair of the highest order here.

Huge capacity cow and daughter of Klooney's dam Prue H4, with a Rector R53 heifer calf at foot (NMM23U35), born 25/1/23. R50 lost her first calf at four days of age through misadventure and no fault of her own. We declare this for transparency, but hope it doesn't impact demand. R50 is a quite magnificent animal with wonderful heritage. A mirror for the previous Lot, they present so much potential as a herd building couple. It would be a smart play to purchase both Lots and build from there.

Incredible fleshing and hindquarter depth evident here. R24's pedigree draws together two of our finest females in recent history. Nectar's dam, Prue H113 was the first cow in the breed to produce three \$40,000 bulls. Prue H4 is dam to the legendary Klooney who fetched \$80,000 at our 2015 sale and has progeny all over the world. We retain a smart T heifer by Quarter Pounder and two recently born ET siblings to the calf at R24's side. Paratrooper heifer calf at foot (NMM23U156), born 22/2/23.

Huge capacity youngster descended from the matriarch Brenda Y33 line. R62's first calf is a very promising Rocketman bull who sells in September. We have three of R62's ET calves on the ground, with calves also at Clift Angus from embryos sold to that programme. She is a young cow we expect to make a big impact. Impressive Paratrooper heifer calf at foot (NMM23U182), born 2/3/23.

R97 is a tremendous bodied young cow we used for two rounds of embryo work after she calved down last year. She has \$12,000 in embryo sales and four calves recently arrived here to her credit. All this was achieved without missing a beat as regards her natural calving schedule. It is extremely high profit performance. R97 is a cow that fits the bill across all facets. She has a beautiful maternal pedigree descended from Brenda Y33, with Crusader of Stern & Theo in the recent background. A very pleasing animal to the eye, she exhibits unmatched fleshing and hindquarter volume and Nectar's typically excellent structure. R97's first calf is a very smart bull we expect to shine at the sale later this year. R97's grand dam fetched \$18,000 at our 2017 female sale. Paratrooper heifer calf at foot (NMM23U168), born 26/2/23. Another wonderful cow & calf from which to establish a stud's foundations.

Everyone with Nugget females loves them. They possess ultra sound skeletal structure, good udders, with slick skin and moderate scale. R3 is a splendid cow with a tremendous maternal background, featuring Klooney's mum, Prue H4 as grand dam. The 2nd calf from R3's mother fetched \$55,000 to Springwaters Angus Stud at our 2022 bull sale. We retain a beautiful T drop Quarter Pounder daughter from R3 & two recently arrived ET calves from a flush we ran without disrupting her natural calving pattern. Thick topped Rector R74 bull calf at foot (NMM23U175), born 28/2/23, and carrying a superb combination of the very best maternal Australian Angus bloodlines of recent generations.

Matriarch Abigail S104, Woody W100, Hingaia 469, BT Right Time and Henry VIII are all thrown together with P15 to give R56 a peerless Angus cow maker heritage. Her dam is the superb mature cow that sells at Lot 15. Like so many of the calves, the Rector R53 bull calf (NMM23U203), born 18/3/23, presents an extremely high value proposition. He comes from the very heart of the herd, and on paper certainly has stud sire potential.

Nugget will go down as a maternal powerhouse once his daughters reach mature age. They are peas in a pod and made just right. A beautiful background to the bottom side of R60's pedigree with Woody W100, Hingaia 469 & Henry VIII backed by the giant influence of Abigail S104. Her dam has produced several other excellent progeny including the \$16,000 Lot 1 bull at our 2019 sale. A maternal sister sells at Lot 59. Rembrandt is the perfect choice as sire of the heifer calf at foot (NMM23U171), born 27/2/23.

Nugget over Klooney delivers so much maternal quality. R61 is a lovely feminine young cow, with an equally appealing full sister that sells at Lot 62. As with the cow that sells next, the bull calf at foot (NMM23U62) by the \$240,000 Rembrandt NMMR48, born 29/1/23, has the extraordinary grandsire/great grandsire combination of Paratrooper, Kingdom, Nugget & Klooney. It is the culmination of the very best we have produced since 1969. He is an incredible prospect. Remembering the brothers of these cows set a world record average in 2021, we are in a rich vein through this section of the sale.

The Nugget/Klooney combination presents again - it's a maternal combination for the ages. A superb full brother to R67 sold for \$42,000 at our sale last year. Similar to the cow at the previous Lot, the Rembrandt heifer calf at foot (NMM23U112), born 4/2/23, has the extraordinary grandsire/great grandsire combination of Paratrooper, Kingdom, Nugget & Klooney, representing the very best we have produced.

An absolute highlight of the offering here and the Lot that follows. R95 and R118 result from the combination of two of the best animals we have bred in 54 years, Paratrooper & Flower N30. N30 features under special terms at Lot 11. R95 is the complete spectacle to inspect. She displays everything we look for in the modern Angus female; beautiful feminine phenotype, excellent skeletal and udder structure, balanced figures across the board, an outstanding pedigree, and strong performance from her first calf. We flushed R95 as a maiden and again after she calved down. Notably she achieved this without dropping out of her annual calving pattern. She is now primed for a 12 month stint of embryo collection right away for her new owners. She nurses a Rector R53 heifer calf at foot NMM23U155), born 22/2/23. It is hard to imagine she won't grow into an elite donor female as well. A hard package to value, these are exceptional young brood cows and certainly up with the best we have ever produced. They would compare favourably against the best from anywhere in the world.

Full sister to the previous cow, with similarly massive claims as a foundation cow from which to build an elite stud herd. R118 has been phenomenally productive for us already. She was flushed twice after her first calf without dropping out of the joining season. \$27,000 in embryo sales & eight ET calves landed here as a result. Further endorsement comes from the fact that we selected R118's first calf, Flower T5, to flush as a maiden in February. A Rector R53 daughter, David Christie nominated her as the clear stand out heifer in a contemporary group of 86. I agree with him. T5 is full sister to the excellent Rector R53 bull calf at foot (NMM23U170), born 27/2/23. With an amazing pedigree and data combination, it would be no surprise to see him in a semen catalogue in 18 months time. The earning and herd building potential of this pair is immense. We cannot produce better all round Angus breeder combinations. These two cows deserve serious competition, I cannot venture which one is better.

The females through this section of the catalogue must be among the best in the breed. This cow by Marlon Brando is another beautiful example. R113 comes from my pick of the Witherswood dispersal in Kerry D8. She has done wonderful things for us, having just delivered her 12th natural calf, along with 18 ET progeny at the grand age of 15 years. R113 displays the length and body depth, and ultra feminine phenotype that is Brando's hallmark. She has an equally appealing sister that sells at Lot 45, while a brother from the same flush fetched \$22,000, aged 12 months, at our 2020 sale. Two younger full sisters sell among the first calvers at Lots 60 & 85. Both R113 & R110 were flushed after their first calf with three ET calves now on the ground from each cow. Chunky Rector R53 bull calf at foot (NMM23U167), born 26/2/23.

Plenty of Kiwi blood in the genetic profile behind this cow, with a double shot of Crusader of Stern, triple dose of Hingaia 469, Matauri Reality and Waimata Lad all in the mix. R103 is a beautifully proportioned cow with plenty of scope. She is ideally matched with Rector R53 to produce the thumping bull calf at foot (NMM23U91), born 1/2/23. He has legitimate sale topping potential.

Superb maternal lineage to this cow. Matriarch cows Flower G20, Flower S110 and Abigail S104 combine with the famed Prue H4 on the bottom side of the pedigree. Legendary cow makers like Woody W100, Hingaia 469, Summitcrest Powerplay, Booroomooka Theo, Megaforce, Klooney, Right Time 24J and Matauri Reality galvanize the depth of breeding behind Flower R151. Her dam is the feature cow selling at Lot 8, with maternal sisters at Lots 56, 125 & 129. By a bull leaving some beautiful females in M308, R151 is a superb cow to witness and nurses a beautiful Powerpoint R45 heifer calf at foot (NMM23U245), born 27/2/23.

Unique genetics here. A magnificent cow to inspect, R154's pedigree carries significant diversity to current mainstream Angus bloodlines. A descendant of Flower G20, her ancestry is brim full with prolific donor cows right back to the 1980's. Maternal brothers have sold for \$26,000, \$30,000 & \$65,000. R154 sells with the vendor retaining possession for the first two flushes post sale. The purchaser has the right to 1/2 share in costs and embryos from those programmes should they choose. 100% possession of the cow will transfer to the purchaser upon completion of the 2nd flush or October 1st 2023, whichever comes sooner. Invoicing will occur at that time. The Rembrandt heifer calf at foot (NMM23U232), born 4/2/23 remains the property of the vendor. Special opportunity.

Our R cow vintage is one for the ages. This is another majestic example of how we think an Angus cow should look. R4 has a wonderful deep, round quarter, superb skin and oozes feminine style. She is another descendant of the famous Flower G20/Y141 line. Her maternal sister sells at Lot 87. We retain, and have flushed, a lovely T drop full sister to the calf at R4's side, as well as three recently born Nugget ET calves from embryos harvested within R4's normal breeding cycle. Nugget bull calf at foot (NMM23U176), born 28/2/23.

First calf of a cow starting to make her mark for us. P22's 2nd calf fetched \$80,000 at our sale last year. As is regularly the case with Milestone females, R21 is a super stylish, fine fronted young matron with beautiful udder set up. She has a big future. Exciting prospect in the record breaker Rocketman's bull calf at foot (NMM23U119), born 5/2/23.

Feminine, clean fronted youngster, typical of the Nugget daughters. R66's dam was an excellent breeder for us with over \$150,000 in sales, including her last son who fetched \$40,000 in 2022. With daughters like G276, R66's grand dam, Rado D136 has established herself as one of the major impact females backing our herd for the past decade. Bull calf at foot from the "no brainer" mating with Rocketman, (NMM23U103), born 3/2/23.

The Marlon Brando daughters are stunning. R110 comes from my pick of the Witherswood dispersal, in Kerry D8. She has done wonderful things for us, having just delivered her 12th natural calf, along with 18 ET progeny at the grand age of 15 years. R110 exhibits the lovely clean lines and ultra feminine phenotype that Brando transmits every time. Her ET sister sells at Lot 36, while a brother from the same flush fetched \$22,000 aged 12 months at our 2020 sale. Two full sisters sell among the first calvers at Lots 60 & 85. Both R110 & R113 were flushed after their first calf with three ET calves now on the ground from each cow. PTIC to Powerpoint NMMR45 - calf due 21/3/23. (Calf details will be provided at our website ahead of the sale).

With F141 as grand dam, R126 is from the same line as Prue M4 who sold as a PTIC heifer for \$190,000 at our last female sale. She remains the high selling female in breed history and a magnificent mature cow at Brooklana Angus. A maternal sister sells at lot 97. R126's recent ancestry of superb phenotype animals manifests in her textbook eye appeal. She is a classic example of what we strive for in the modern Angus female. Fascinating genetic combination behind the excellent Rector R53 bull calf at foot (NMM23U102), born 3/2/23.

A two times descendant of matriarch cow Abigail S104, with Flower G20 & Flower Y141 also in her background. R128 is a beautifully put together young cow carrying the absolute best maternal bloodlines from our 54 years in the business. This is validated by the phenomenal job R128 did with her first calf. He weighed over 500kg, two weeks shy of 12 months and is likely to appear in the top pen at our next bull sale. She nurses another wallowing Rocketman bull calf at foot (NMM23U137), born 14/2/23.

Beautiful moderate framed young cow with the rounded hindquarter expression that is Nectar's call sign. The fabled Brenda Y33 is great grand dam. R69's mother is a very good breeder for us with three daughters used in our ET programme and \$120,000 in bull sales. We flushed R69 once last Autumn, with several ET calves on the ground. High quality pedigree diversity in the pregnancy due by Powerpoint NMMR45 on 19/3/23. (Calf details will be provided at our website ahead of the sale).

Descending from the grand matriarch Abigail S104 & backed by a pedigree littered with maternal giants like Woody W100, Ythanbrae Henry VIII, Hingaia 469 & BT Right Time 24J, R86 is bred in the pink. She is a moderate framed young breeder whose dam has been flushed extensively in recent times and sells at Lot 14. Maternal brother to R86 sold for \$50,000 at our sale last year. Thumping Paratrooper bull calf at foot (NMM23U190) born 6/3/23.

R108 is a beautifully constructed breeder coming from the best Aviator female we bred. A smaller framed cow, P92 transmits impeccable structure to the offspring. Her 2nd calf fetched \$36,000 at our last bull sale. The grand dam, Prue H113 is well known as the first cow in the Australian Angus herd to produce three progeny at \$40,000 or more, including Nectar N334. We have an excellent Rembrandt/R108 son that will feature at the bull sale this year, while R108 nurses a promising Rocketman heifer calf at foot (NMM23U82), born 31/1/23. The evidence suggests it would be a good move to flush R108 to either of these great sires.

R132 & her maternal sister who follows next are descended from the grand 1997 born matriarch cow Abigail S104. They are offspring of the mature donor cow at Lot 7 and maternal sister to the elite up and coming donor Abigail P152. Four maternal brothers have sold to tops of \$30,000 & \$32,000. Another maternal sister sells at Lot 170. Cracking genetic pairing to produce the Rocketman heifer calf at foot (NMM23U233), born 5/2/23.

Three lovely full sisters enter the ring consecutively. They are daughters of Abigail M284, a prolific donor cow with over \$300,000 in progeny earnings. Their full brother was a standout at our 2020 sale, fetching \$30,000. R135 and her sisters come from an outstanding maternal line stemming from Abigail Y116 & B10 who together did so much to fast track the renowned Mandayen herd in SA. High value Paratrooper bull calf at foot(NMM23U239), born 23/2/23. The Paratrooper/Loch Up cross has been wildly popular. Seven bulls with this parentage averaged an incredible \$54,000 at our bull sale last year.

The sire of R145 and her sisters selling either side, Loch Up L133, was the \$85,000 2016 high seller for the Angus breed nationwide. Loch Up is having a major impact through his daughters. At our sale last year, the 13 maternal grandsons of Loch Up achieved the sale high price of \$160,000 and the staggering average of \$56,400. This is \$12,000 more than the world record average achieved across the entire sale draft, and unequivocal endorsement of Loch Up's maternal credentials. Cracking Paratrooper bull calf at foot (NMM23U230), born 2/2/23, representing another very high value proposition.

Full sister to the previous two Lots. The Loch Up females add terrific top line spread and natural hindquarter thickness to their calves. Paratrooper bull calf at foot (NMM23U222), born 30/1/23. At our sale last year seven Paratrooper sons from Loch Up females sold to a top of \$80,000, and averaged \$54,000. It is an extremely reliable genetic pairing. Four maternal sisters by Nugget sell at Lots 90, 91, 101 & 102.

Superb maternal lineage to this cow. Matriarch cows Flower G20, Flower S110 and Abigail S104 combine with the famed Prue H4 on the bottom side of the pedigree, while legendary cow makers Woody W100, Hingaia 469, Summitcrest Powerplay, Booroomooka Theo, Megaforce, Klooney, Right Time 24J & Matauri Reality solidify the depth of breeding. R152's dam is the cow featured at Lot 8 (with \$339,000 in progeny sales to her credit already). Two full brothers fetched \$48,000 & \$50,000 at our sale last year. A maternal sister sells at Lot 38, with full sisters at Lots 125 & 129. Fabulous Powerpoint R45 heifer calf at foot (NMM23U235), born 7/2/23. This is an outstanding unit.

Super looking heifer descending from the legendary Abigail S104, with the famous NZ cow maker Hingaia 469 high up in the pedigree. He adds to iconic names like Woody W100 & Ythanbrae Henry VIII deeper down the line. A maternal brother was the \$16,000 Lot 1 bull at our 2019 sale. A maternal sister sells at Lot 31. Giit edge bloodlines in the stunning Rector R53 heifer calf at foot (NMM23U23), born 23/1/23. The Rector/Paratrooper cross is a brilliant complementary combination, without outstanding phenotypic & structural outcomes and ideal trait balance on paper.

The Marlon Brando daughters are stunning. S46 comes from my pick of the Witherswood dispersal, in Kerry D8. She has done wonderful things for us, having just delivered her 12th natural calf, along with 18 ET progeny at the grand age of 15 years. Two full sisters sell as three year olds at Lot 36 & 45 - they were both flushed after their first calf - with another full sister among the 1st calvers at Lot 85. A brother from the same flush fetched \$22,000 aged 12 months at our 2020 sale. These are young Angus breeders of the highest order. S46 nurses a hefty Powerpoint R45 bull calf at foot (NMM23U44), born 27/1/23.

An attention grabber from the outset, S47 was flushed as a maiden for seven embryos. She carries outstanding bloodlines on both sides of the pedigree. The dam side goes right back to the acclaimed Canadian cow maker Winton Lad 6H, with the stellar reputations of VPI Lord Patriot, Henry VIII, Woody W100 and Highlander of Stern all enhancing the maternal appeal. On the top side of the pedigree is Quartz, whose progeny are some of the best we have bred. His five sons offered at our sale last year fetched the amazing average of \$55,000 each. Smashing Rector R53 heifer calf at foot (NMM23U146), born 19/2/23, with so much genetic versatility. This is a very special unit, not to be missed.

Very similarly bred to the previous Lot, with Rado D136 in the recent background. The Paratrooper/Loch Up combination has met insatiable demand at our past two bull sales, due to their extraordinary thickness and visual carcass shape. In 2021, six bulls with this genetic mix averaged \$36,667 to better the sale average by \$2000. Last year, at \$54,000, seven of them beat the world record sale average by almost \$10,000. A maternal brother to S60, by Nugget, sold for \$30,000 at the 2021 sale. Powerpoint R45 bull calf at foot (NMM23U200), born 16/3/23.

Typical Klooney style on display. He is one of the most popular bulls in the breed for good reason. The maternal impact he has made here and on the breed globally is immense. At our sale last year, 28 bulls from Klooney dams sold for the incredible average of \$48,500. Sold in 2015 for \$80,000, and now aged nine years, he remains in peak health, working the cows at Cherylton Farms in WA. Outstanding donor prospect heifer calf at foot (NMM23U4) by Rocketman, born 16/1/23.

S9 possesses a brilliant outcross maternal pedigree, backed by a rock solid data set right across the board. Animals like this are very hard to find. She is sired by Quartz, whose five sons at last year's sale were outstanding, averaging \$55,000. S9's dam, Q44, is our best 255 daughter. The grand dam J154 remains in the herd with an excellent progeny record. Her sire is by the pure NZ blood Waimata E230. The legendary matriarch Brenda Y33 underpins the pedigree two generations further back. S9 has put everything into the sappy Powerpoint R45 bull calf at side (NMM23U116), born 4/2/23. With a diverse pedigree and beautifully balanced data set, he is right where we aim to target the all round role required of the Angus breed.

Elite unit. S13 owns a magic pedigree descended from the fabled Flower G20/Y141 line. She is the first calf of an excellent cow, whose lineage combines the maternal strength of Chisum 255 matched with one of the best cows we have bred in Flower N30. Nugget over the top, adds another line destined for maternal greatness. It does not come much better. We flushed S13 as a yearling with four ET calves just arrived. We recently flushed her dam's 2nd calf too. She is a beauty. S13 has a cracking Rocketman heifer calf at foot (NMM23U61), born 29/1/23, marrying the very best Australian and US genetics together. This pair is straight from the penthouse!

Paratrooper x Loch Up x Klooney - pedigrees like this highlight the incredible depth of breeding in our herd. Consecutively, the three sires are: the 2019 high seller (and former record priced bull of the breed), the 2016 high selling bull in the breed, and the 2015 2nd highest selling bull in the breed. They combine to create a powerful first calver right from the centre of the Millah Murrah programme. S17 suckles a splendid Rector R53 heifer calf at foot (NMM23U14), born 21/1/23. As with so many of the calves and pregnancies in this sale, it owns an almost perfectly balanced data set, right in the zone for the all round role required of Angus in the industry today. She's got donor potential written all over her.

Super style of female from the Flower G20/Y141 line. S41 is raising a very impressive Powerpoint R45 bull calf at foot (NMM23U1), born 15/1/23, with a gestation length of just 268 days. All traits have a ceiling of optimality and I'd say this fellow has reached that. With over 80% strike rate in terms of bull calves seeing paddock duty, chances are that the purchaser will have a top notch sire in their possession in less than 12 months time.

Super star package here. To get the sort of consistency and eye appeal evident in our herd, you have to use a pure breeder's key tool. That is line breeding, with sensible genetic intervals, to the best producing animals in the breed. S61 is a classic example of this approach, over a 50 year period. Research of her background shows a feast of maternal greatness, featuring a double cross of Right Time 24J, five injections of Hingaia 469, Ythanbrae Henry VIII, a double dose of Winton Lad, and a triple cross of our 1973 born foundation sire Hazeldean Rapier. The result is a spectacular Angus female in S61. Her Rocketman bull calf at foot (NMM23U47) is a better. Born 27/11/23, he is an absolute heart of the herd article.

Fascinating opportunity here. The sire, Ulong U41, was a bull whose progeny I admired around the start of the century. The dam, Brenda N8, descends from the grand matriarch Y33 and Loch Up's dam H49. She is well known as the sire of our \$60,000, 2020 high seller, and wide use semen sire, Quixote Q96. N8 has produced several other sons to sell at \$40,000, including a full brother to S97 at our sale last year. S97 nurses a distinctive heifer calf at side (NMM23U11), born 20/1/23, by Quartz NMMQ29. It brings together the magnificent pair of Klooney daughters, Flower N30 & Brenda N8 in the one animal. With such a glittering ancestry, plenty of genetic diversity, and a very handy data set, both mother and daughter are exclusive donor cows in the making.

Big framed female from the same maternal line as Kruse Time & Paratrooper. S116's dam has produced three sons to average \$30,000. She is raising a lovely bull calf (NMM23U70) by Rector R74, born 30/1/23. R74 is serving stud duties at Inglebrae Angus Stud at Tenterfield. His first progeny born here last spring were standouts at weaning.

Magnificent young breeder here. Q29 delivers so much depth and capacity to his daughters. They are foundation quality breeders without exception. S120's pedigree is backed by cornerstone cows Flower G20, Flower S110 & Abigail S104 in her dam line. Her dam's first calf fetched \$26,000 at our 2021 sale. Smashing Rocketman bull calf at foot (NMM23U29), born 24/1/23. This is an elite herd foundation package.

What a picture this young cow makes. So much body depth and hind quarter fleshing. It is hard to see what can be physically improved. The Paratrooper x Kingdom combination is as good as anything we have ever developed, with crazy consistency and market demand. 14 bulls derived from this combination have averaged \$58,000, to underpin our world record averaging bull sales in 2021 & 2022. The \$240,000 2nd highest selling bull in breed history, ABS global semen sire Rembrandt R48, carries the same two generation paternal ancestry. S138's dam sells at Lot 2. She has five sons to her credit at a \$26,000 average. I love the genetic pairing with Rector R74 to produce the heifer calf at foot (NMM23U244), born 26/2/23. It carries the type of data balance we target with the paper side of things.

Typical Quartz fleshing and softness evident. S5 and her daughter make a regal looking pair. They are descended from Prue H112, the former record priced cow of the breed. The most stimulating part of this profession is putting the sire and dam together with a phenotypic goal in mind. It is an inexact science for sure, but very much an essential skill, demanding extensive first hand knowledge of the global gene pool. A cracking match up here, with Rocketman and Quartz combining for the heifer calf at side (NMM23U15), born 21/1/23. Expect exceptional thickness and doing ease as she matures.

Moderate framed, thick young female from a pedigree stacked for maternal brilliance. Originating with matriarch Brenda Y33, S6 descends from Loch Up's dam Brenda H49, through to Quixote's dam, Brenda N8 as grand dam. With Chisum 255 and his spectacular mother Blossom 0278 added to the mix, S6's maternal credentials are abundant. Rector heifer calf at foot (NMM23U192), born 10/3/23.

We just love the Nugget females. S12 is so compact and tidily made. The amazing Flower cows G20 & S110 from the 1987 & 1997 calf crops appear behind so many of the best animals in our herd. This is another outstanding female from that line. S12 was programmed for ET work as a maiden and is the first calf of an exceptional Capitalist donor female in Q82. Her two maiden Quarter Pounder Daughters were also flushed in February. S12's grand dam is the excellent Kingdom cow that sells at Lot 19. The Rembrandt bull calf at foot (NMM23U51), born 28/1/23, took a check at five weeks, but is better now and rounds out an elite combination.

The Marlon Brando daughters are stunning. S19 comes from my pick of the Witherswood dispersal, in Kerry D8. She has just delivered her 12th natural calf, along with 18 ET progeny at the grand age of 15 years. Impressive full sisters sell as three year olds at Lots 36 & 45, with another full sister among the 1st calvers at Lot 60. A brother from the same flush fetched \$22,000 aged 12 months at our 2020 sale. These are young Angus breeders of the highest order. Lovely Powerpoint R45 bull calf at foot (NMM23U79), born 31/1/23.

Beautifully put together, moderate framed first calver with the immense mid piece capacity that is Nectar's trademark. S93's lineage runs deep with time honoured cow maker sire lines. Hingaia 469 & Crusader of Stern each feature twice to anchor the maternal attributes of renowned modern greats Hector & Kruse Time. Rembrandt heifer calf at foot (NMM23U191), born 7/3/23. Its pedigree includes a third layer of Hingaia 469's legendary influence.

Foundation quality pair right from the core of our herd. S103's dam is the full sister to Kingdom K35. He is the \$150,000, 2015 sale topper and former record priced bull of the breed. K5 has an impressive record in her own right, recently delivering her 9th natural calf, including four sons to a top of \$38,000 in 2021. The heifer calf at foot (NMM23U16) by Rembrandt, born 22/1/23 is a classic example of the kind of structured line breeding we have employed since the stud's inception. Well considered line breeding, with adequate genetic interval, is the pure breeder's key to achieving phenotype uniformity. Barring unforeseens, the new owner will soon have two donor class females on their hands.

Terrific maternal line behind these girls, originating with Abigail Y116 & her daughter B10 who were lynch pins in the foundation of the renowned Mandayan herd. We joined all four sisters to Rembrandt. He is the perfect foil for Nugget daughters. We have great confidence in how the progeny will grow out. Rembrandt bull calf at foot (NMM23U242), born 24/2/23.

S40 descends from Kruse Time's dam Ela A204. The grand dam Ela E76 is a beautiful type too. Purchased by Ascot Angus for \$9000 at our 2013 female sale, she is still going strong, with around \$100,000 in bull sales and several daughters performing in the herd. S40's dam has bred reliably, with progeny sales including a son at \$18,000 in 2016, a maiden heifer at \$10,000 in 2017, and two other sons selling at \$20,000 each. Perfect mating with Rector R53 to create the densely made heifer calf at foot (NMM23U7), born 19/1/23.

S51 was Twiggy's choice to lead at the (COVID cancelled) Angus Round Up of 2022. Timid with the cattle to that point, S51's gentle nature gave her loads of confidence. Hingaia 469 appears four times in the extended pedigree, with another shot of 469 blood in the Rembrandt sired heifer calf at foot (NMM23U151), born 20/2/23. The only son from the dam of S51 fetched \$26,000. S51 is a moderate young cow with extraordinary fleshing and softness and all the wonderful doing ease traits that made the breed great. We love her.

Lovely true to Angus type female descended from the phenomenal Flower cows G20 & S110. The Paratrooper x Kingdom match never fails. S53's dam sells at Lot 19. Her full brother fetched \$28,000 at Lot 2 before things heated up at our sale in 2021. A maternal sister, Flower Q82, is a standout in her year group, set to become an ET fixture. S53 sells with an excellent Banquet Quarter Pounder bull calf at foot (NMM23U31), possessing a wonderful "join him to everything" data set, born 24/1/23.

S96 comes from a tremendous maternal line, back to Flower G20 & S110. The great grand dam, F126, played a strong part in fast tracking Ascot Angus Stud. Purchased in 2012 for \$7000, she produced over \$75,000 in bull sales, and many retained females including mother of the \$70,000 QLD record priced bull, Ascot Lion Heart. S96's grand dam, Flower J192 was purchased by Palgrove & Black Diamond Angus for \$22,000 at our 2017 sale. J192's progeny has since won multiple Royal Show championships for her owners. The dam, Flower P10 has an amazing progeny record. Two full brothers to S96 fetched \$40,000 & \$45,000 last year, while a maternal brother by Quartz sold for \$80,000. The heifer calf at foot here (NMM23U10) has fabulous credentials. It is sired by Quartz NMMQ29 and born 19/1/23. With such rare pedigree diversity and amazing proven heritage, she presents as a future donor with unlimited potential.

Plenty of eye appeal to S104 (not be mistaken for the 1997 born legend, Abigail S104 mentioned in so many Lot notes for this catalogue). She is typical of the Nugget daughters, so neatly made with impeccable feet and skeletal conformation. An injection of power with the \$280,000 record holder Rocketman as sire of the bull calf at foot (NMM23U25), born 23/1/23. From the cutting edge of our programme, his potential is infinite.

This is a really good looking young cow, a prototype of what we strive to achieve and one of our favourites among the first calving section of the sale. The flush that produced S121 also resulted in a bull that made \$80,000 last year and the retained joining sire S29. They come from a tremendous maternal line, back to Flower G20 & S110. Described in more detail at Lot 95, the great grand dam, F126, has been a key part of building Ascot Angus Stud in QLD, while the grand dam, J192 has produced multiple Royal Show championships since Palgrove & Black Diamond bought her for \$22,000 in 2017. The bull calf at foot by Rector R53 (NMM23U5), born 17/1/23 is full of potential. He carries an intriguing pedigree and data set and is certainly one we will want to follow as he matures. Opportunity abounds.

S129 is the first daughter from one of the best cows in the herd who features under special terms at Lot 12. She carries a rich maternal pedigree, underscored by a double dose of Hingaia 469 and the phenomenal influence of matriarch Abigail S104. The dam is the youngest cow in the breed with four sons that have sold for \$40,000 or more. The sire, Baldrige Command, transmits terrific thickness and carcase shape to the progeny. Terrific heifer calf prospect at side by Rector R53 (NMM23U143), born 18/2/23.

Descended from the matriarch Flower G20/Y141 line. S140's five generation sire ancestry of Paratrooper x Hector x Emperor x Crusader of Stern x New Design 036 epitomises the way we have blended conservative and adventurous genetics for decades. Dam sells at Lot 5. Powerpoint R45 bull calf at foot (NMM23U234), born 6/2/23.

Two full sisters sell consecutively. They are daughters of Abigail M284, a prolific donor cow with over \$300,000 in progeny earnings. Two other full sisters sell at Lots 90 & 91, while three full brothers sold at the sale last September to average \$35,000. S145 is alot earlier maturing than her siblings, very thick and moderate framed. Three maternal sisters sell at Lots 53, 54 & 55. Beautifully bred heifer calf at foot by Rembrandt (NMM23U243), born 25/2/23.

A feature of the PTIC mature cow section, M295 spent 12 months in the donor pen prior to her current pregnancy. Her first son sold for stud duties to Coolarmagh Angus for \$26,000 in 2020. Her 2nd son fetched \$36,000 in 2021 and has been used by AI in the Millah Murrah herd - M295 carries his full brother in utero. Her 3rd son was the phenomenally thick yearling son of Nectar that sold to Dave McLeod for \$100,000 last year. We have two outstanding Rembrandt weaners set to feature in the yearling section of our next bull sale. In a herd renowned for producing thick cattle, no cow transmits more. To inspect, M295 is a moderate cow with extraordinary doing ability and easy fleshing. She is backed by the superb matriarch cows Rado D136 & G265. A foundation cow of the highest order, we retain a Powerpoint daughter, and await more than a dozen ET calves due this spring. Male pregnancy confirmed from AI to Paratrooper NMMP15 on 3/11/22.

Donor female with a fantastic production record, once again from the extraordinary Rado D136/G265 line. Her 1st calf, P200, is a donor cow, with a \$40,000 son to her credit. Four more daughters sell at Lots 117, 118, 132 & 141. M215 is dam of the \$110,000 lead off yearling at our world record averaging sale last year, bought by Palgrove & Heart Angus. She sells PTIC the same way, with a female pregnancy confirmed from AI to Paratrooper NMMP15 on 3/11/22. Other sons have fetched \$38,000, \$45,000 & \$50,000. M215 is a super producer, with enormous milk production. She has been a wonderful breeder for us and presents a high value donor proposition for her new owner.

The only K400 cow in the sale. We love the impact he has on the maternal phenotype, stamping his daughters with massive broad bodies and depth through the quarter. We retain two M339 daughters, with two sons set to come forward in 2023 & 2024. M339's Nobleman S drop son is the heaviest bull among his 60 contemporaries and set to be a feature at our next sale. Female pregnancy confirmed from AI to Rembrandt NMMR48 on 4/11/22.

Beautiful style of cow, typical of the Kingdom phenotype. They are big, bold cows with tremendous skeletal angles, doing ability and longevity, and do a wonderful job on their calves. Yet another descendant of the Y116/B10 line here. Female pregnancy confirmed. Sired by NMMR127. Natural mating date estimated by vet as 18/11/22.

Last of the Kingdom matrons. What they lack in data is more than compensated in type. They transmit so much capacity and style and featured heavily behind our record bull sales of recent years. M235 has only bred females until 2022, with one outstanding Q daughter set for ET work this spring. Female pregnancy confirmed from AI to Paratrooper NMMP15 on 11/10/22.

Only son to date sold for \$38,000. Experienced eyes will settle on the exciting pedigree and performance predictions for the female pregnancy, confirmed from AI to Taimate Roy NZE12865020R38 on 19/12/22. Outcross pedigrees with this sort of complete data set are as rare as hens' teeth. It is an "ouch" moment as the vendor.

We open the PTIC heifer section with the first of three full sisters to the \$110,000 2nd high seller at last year's bull sale. An exceptional trio of females, they carry high value pregnancies and generations of breed leading bloodlines in their background, descending from the matriarch Rado cows D136 & G265. The length of body and strength of top line they display is without equal in my experience. Their dam sells at Lot 104 with almost \$250,000 in progeny sales against her name already. S267 was flushed twice before the natural mating season with seven pregnancies resulting. She carries a confirmed female pregnancy from AI to Powerpoint NMMR45 on 25/11/22. These are phenomenal herd foundation prospects that warrant strong competition. Full sisters sell next and at Lot 132.

Right from the core of our programme, S282 is a superb female to inspect. Her stunning donor cow dam is by Loch Up - the 2016 high selling Angus bull in Australia, out of Kingdom's dam Flower G41. A spectacular full brother to S282 made \$30,000 as a yearling in our 2021 sale. We cannot offer more cutting edge access to our programme than the male pregnancy confirmed from AI to Taimate Roy NZE12865020R38 on 12/10/22. Among the first of very limited Roy progeny to land in Australia next spring, on paper he is an AI sire prospect in the making. This is a super elite package.

S287 is a cracking type with a maternal heritage tracing twice to the grand matriarch Brenda Y33. Her grand dam made \$20,000 at our 2017 cow sale with 29 progeny to her name. The great grand dam fetched \$11,000 at our 2013 sale. High value male pregnancy confirmed from AI to Ramjet NJWR1029 on 12/10/22, again offering access to the vanguard of our programme.

A standout since weaning, S166 is a beautiful example of the Angus breed. She comes from a notable lineage, with Prue F141 as great grand dam. F141 is the dam of Prue M4, who shattered all records when she sold for \$190,000 to Brooklana Angus at our 2017 female sale. S166 is the first daughter of a magnificent Kruse Time cow who will see more ET work. N151's three sons to date have sold to average \$18,000, with a 4th, an exceptional full brother to S166, set to feature at the next bull sale. Male pregnancy confirmed from AI to Taimate Roy NZE12865020R38 on 3/12/22. It is another mating that oozes possibilities as a future prospect for the breed.

Here is something you don't get to write every day: Full brother sold for \$240,000 at our 2021 sale. S184 is a beautiful heifer and sister to the outstanding industry sire Rembrandt R48. Her mum is a fabulous, easy doing cow and a terrific mother, but try as we have, she just won't flush more than a couple of eggs at a time. So, the new owner is going to own something special. S184 carries an exciting prospect from the heart of the herd in utero, with a male pregnancy confirmed from AI to Rector NMMR53 on 16/10/22. Its predicted data set is right in the zone to fulfill the balanced role required of Angus in the industry today.

A full sister to Rolls Royce comes next in a stellar pen of heifers. Rolls Royce set the all breeds yearling bull record price of \$110,000 at our 2021 sale when he was purchased by Heart Angus. Several other brothers have fetched impressive prices including \$55,000 & \$48,000. S303's dam is the amazing cow that sells as Lot 3. I have never seen a female of her scale that holds it together so well structurally. They descend down the fabulous Abigail line from Y116 & B10 and are backed by multiple generations of cowmaker firepower with Kelp, Henry VIII, Crusader of Stern, Hingaia 469 & Naranghi Quatic all rolled into the bottom 1/2 of the pedigree. We retain a brace of R drop full sisters that will anchor the herd in the years ahead. A full sister sells at Lot 136. They offer buyers access to the very core of our herd. Male pregnancy confirmed from AI to Rector NMMR53 on 25/11/22, with a beautifully balanced data set, indicative of precisely where we think the breed should sit today.

S306's pedigree carries a concentration of supreme maternal bloodlines. She descends from the legendary Summitcrest Powerplay cow Flower G20, on through her Hingaia 469 sired daughter S110. Woody W100 and matriarch Brenda Y33 are also in the mix on the bottom side of the pedigree, and the sire of the donor cow dam, Loch Up, is gaining plenty of momentum as a high rating sire of cows. The top side features the renowned cows Prue H4 & Brenda N8 (also descended from Brenda Y33) and the stunning Spicklers Blossom 0278. Layer upon layer of superb maternal Angus bloodlines culminate in a beautiful heifer we saw fit to flush as a maiden. We have seven calves due in Spring. The dam's first calf sold for \$26,000 in 2021. We retain a full sister to S306, while a full brother sold privately to renowned Victorian weaner producers Diana & David Hurley last spring. Female pregnancy confirmed from AI to Rembrandt NMMR48 on 4/11/22 with all four of its grand sires having topped our bull sales. Pedigrees don't come better than this.

Depth of breeding is our trademark, manifest in the stacked background to this superb young female. Matriarch Flower cows G20 & S110 and Abigail S104 combine with the famed Prue H4 (Klooney's dam) on the bottom side of the pedigree. Legendary cow makers Woody W100, Hingaia 469, Summitcrest Powerplay, Booroomooka Theo & Klooney K42 all add to the maternal equation. S307's dam is the mature donor cow featured at Lot 8. She has almost \$350,000 in progeny sales to her credit. Full sisters sell at Lots 56 & 129. Their full brothers sold for \$48,000 & \$50,000 as yearlings at our sale last year. We are at the culmination of over 50 years dedicated breeding with these maiden heifers. They are future breeders at the pinnacle of the global gene pool. Male pregnancy confirmed from AI to Ramjet NJWR1029 on 12/10/22 with a predicted data combination indicating versatility across all facets of the beef supply chain.

It is like a highlights reel through this section of the catalogue. Another stunning maiden here carrying a rich pedigree backed by matriarchs Flower G20 & Y141, with the fabled Bangadang Lowan A61 added to the brew. The dam is a strong breeder for us with two natural daughters retained, while her first calf was purchased by the shrewd management team of Newbury Farms for \$10,000 at our 2019 sale. Male pregnancy confirmed from AI to Taimate Roy NZE12865020R38 on 19/12/22. The quality of these hard to obtain, thoroughly researched, cutting edge pregnancies, distinguishes the offering.

Yet another heifer with extraordinary credentials. S336's full brother set the then APR record price of \$55,000 in 2021, selling to Grant and Lisa Norman. The dam sells as Lot 110. Another of her sons equalled the previous record APR mark. It is a phenomenal effort from the one cow. We flushed S336 as a maiden once with four pregnancies resulting. I love the potential in the male pregnancy confirmed from AI to Rector NMMR74 on 12/10/22. The predicted data set is near perfect for the all rounder role we believe Angus must fill in the industry. R74 was purchased by Inglebrae Angus' astute Darren Battistuzzi at our 2021 sale. His first calves are stunning.

The first of four flush sisters carrying the back to the future parentage of Ulong & the Hector sired Abigail M293. We retain three sisters in the herd. Ulong was a sire whose progeny I admired in his hey day of the early 2000's. His influence is seen through the likes of maternal grand son Matauri Reality. M293 is a feature of the mature donor cow section at Lot 3. She has almost \$450,000 in progeny sales to her name already, including Rolls Royce who set a then all breeds yearling bull record price of \$110,000 at our 2021 sale. Full brothers to these heifers fetched \$35,000 at our sale last year. The female pregnancy confirmed here from AI to Taimate Roy NZE12865020R38 on 25/11/22, features a genuinely unique outcross pedigree and easy to use data set. She is an extremely high value proposition for the Angus seedstock world. Full sisters sell at Lots 133, 143 & 167.

Matriarch Flower cows G20 & S110 and Abigail S104 combine behind the scenes with the famed Prue H4, to give S281 one of the strongest maternal pedigrees in an extraordinary catalogue of breeders. S281's dam is the mature donor cow featured at Lot 8. She has almost \$350,000 in progeny sales to her credit. Full sisters sell at Lots 56 & 125. Their full brothers sold for \$48,000 & \$50,000 as yearlings at our sale last year. We flushed S281 as a maiden with one pregnancy resulting. Future breeders with these sorts of credentials usually come along once in a sale. I love the phenotype combination for the Male pregnancy confirmed from AI to Taimate Roy NZE12865020R38 on 19/12/22. I saw Roy in NZ last year and loved his robustness and nuggety eye appeal. He will blend beautifully with the elegance and refinement of these Millah Murrah heifers.

Delightful heifer from the epicentre of our programme, featuring the wonderful Paratrooper/Kingdom combination that has produced 14 sons at an incredible \$58,000 average. S203 exhibits a lovely rounded hindquarter and softness, a long strong top line, excellent angles through the joints, and high head carriage on the walk. She oozes femininity and epitomises the style of female for which we strive. Possessing a superior maternal background, S203's grand dam, Prue H113, was the first cow in the breed to produce three progeny at \$40,000 or more. Her dam Prue N156, is a pearl. We retain two full sisters to S203. Female pregnancy confirmed from AI to Taimate Roy NZE12865020R38 on 16/10/22, again giving access to the frontline of our herd's 54 year evolution.

The Paratrooper/Kingdom blend features again. The dam is a magnificent type we tried in vain to flush. With the Rado matriarchs G265 & D136 as grand dam and great grand dam, S277 comes from blue ribbon origins. Superior phenotypic repeatability like this does not come about by one generation of chance mating, it takes decades of discipline to achieve. S277 is another splendid example of the type of animal we desire. Paratrooper's sons have been so popular for their extraordinary eye appeal and dimension. The females are the same, exhibiting phenomenal length, with magnificent skin and overall quality. They are the prototype modern Angus animal. Female pregnancy confirmed here, from AI to Rector NMMR53 on 12/10/22. The pedigree of this pregnancy is heart of the herd stuff, again with a splendid no holes data set that will open up all joining options.

Maternal sister to the \$110,000 2nd high seller at last year's bull sale. S268's full brother fetched \$38,000 as a yearling the same day. She descends from the matriarch Rado cows D136 & G265. The dam sells at Lot 104 with almost \$250,000 in progeny sales against her name already. Maternal sisters sell as the lead off pair in the PTIC heifer section, Lots 117 & 118, and at Lot 141. S268 is an outstanding donor prospect with a female pregnancy confirmed from AI to Nugget NMMN266 on 12/10/22. All things being equal, we would expect the calf to have similar claims.

The second of four flush sisters to sell. The first presents at Lot 128 with detailed background description there. We retain three sisters in the herd. They possess fascinating high quality, proven outcross bloodlines offering myriad choice for sire selection. Full brothers to these heifers fetched \$35,000 at our sale last year. Female pregnancy confirmed from AI to Nugget, NMMN266 on 4/11/22. Two more sisters sell at Lots 143 & 167.

These next two heifers are from the inner sanctum. Their dam, Flower N30, is one of my all time favourite cows. She is an exquisite animal under the eye and performs so well where it counts, as a brood cow. She features under special terms at Lot 11. Maternal brother to these heifers is Quartz Q29, my pick and the \$42,000 2nd high selling bull from our Australian record averaging 2020 sale. His daughters are stunning, with several stand outs earlier in the sale. Spectacular maternal sisters sell as catalogue highlights at Lots 34 & 35. The sire of S195, Nugget, I believe is destined for maternal greatness. His daughters are just so motherly and correctly made. Wonderful Female pregnancy confirmed from AI to Rector NMMR53 on 28/12/22. It comes from the very core of our programme, with what we believe is a perfect "centre graph" predicted performance set across the board.

S293 is full sister to Rolls Royce R275, who set the all breeds yearling bull record price of \$110,000 at our 2021 sale when purchased by Heart Angus. Several other brothers have fetched impressive prices including \$55,000 & \$48,000. S293's dam is the amazing cow that sells as Lot 3. They descend down the fabulous Abigail line from Y116 & B10 and are backed by multiple generations of cowmaker firepower with Kelp, Henry VIII, Crusader of Stern, Hingaia 469 & Naranghi Quatic all rolled into the bottom 1/2 of the pedigree. We retain a brace of R drop full sisters that will anchor the herd in the years ahead. A full sister sells at Lot 123. Another golden opportunity for buyers to get in on the ground floor with the male pregnancy confirmed from AI to the tightly held Taimate Roy NZE12865020R38 on 12/10/22.

Something a bit unusual here with Ulong and Klooney combined. One of the attractions to Ulong was his uncommon combination of strong IMF and Net Feed intake. S296 has inherited a similar combination for those traits. The stronger draw to Ulong was the progeny quality I saw when he was in high use at the start of the 2000's. We used him in an Argentine joint venture at that time. S296 is a big girl for a Ulong. Her mother is a powerful cow and an excellent producer for us. Her two sons have sold to a top of \$55,000 to renowned weaner producers Diana & David Hurley from Dargo. Male pregnancy confirmed from AI to Taimate Roy NZE12865020R38 on 12/10/22. It is an exciting prospect, with well considered genetic diversity and fabulous data balance.

Soft, feminine young female backed by the excellent cow breeder LT Driven. Dimity and I loved Driven and Brent Thiel's female focused objectives when we visited for a 2nd time in 2013. I was there most recently last November, and as always the cow herd was a pleasure to see. We scour the globe investigating genetics that enter our herd, and have viewed the sire of every animal in this sale first hand. Indeed I have seen almost every maternal grand sire, and the preceding generation of sires. It is a huge advantage when making joining decisions. Terrific potential in this heifer and the female pregnancy confirmed in utero from AI to Taimate Roy NZE12865020R38 on 13/10/22.

Full sister to the \$110,000 2nd high seller from our bull sale last year, and Lots 117 & 118 who open the PTIC heifer section of the sale. They are an exceptional trio of heifers, with generations of breed leading bloodlines in their background - descending from the matriarch Rado cows D136 & G265. Their length of body and strength of top line is exceptional. The dam sells at Lot 104 with almost \$250,000 in progeny sales against her name already. These are heart of the herd packages with pregnancies from the cutting edge of our programme. Male pregnancy confirmed from AI to Rector NMMR53 on 4/11/22.

Unique is a poorly applied word these days, but it is fair to say we have a genuinely unique pedigree, performance and phenotype package here. S242 is something special. She is the first calf of a beautiful cow that descends from the matriarchs Abigail Y116 & B10. With a pedigree combining some of the great proven outcross genetics from yesteryear, S242's data set is extraordinary, even by modern standards. Above all, she is a smashing heifer to view. For those chasing the full package of outcross pedigree, fancy numbers and true to type eye appeal, it would be hard to find an animal anywhere that surpasses S242. We kept the unique bloodlines flowing with the sire choice behind the female pregnancy confirmed from AI to Sovereign NMM21S371 on 12/10/22. It will feature a double cross of Kruse Time high in the pedigree. Sovereign was a real smokey for us at our sale last year. Purchased at \$35,000 by the astute eye of Anthony Skinner, we retained semen and will monitor his progress keenly.

The 3rd of four flush sisters carrying the unusual back to the future parentage of Ulong & the great Hector daughter Abigail M293. We retain three sisters. Ulong's maternal strength is seen through the likes of grand son Matauri Reality. M293 is a phenomenal breeder, a feature of the mature donor cow section at Lot 3. Descended from the Abigail Y116/B10 line, she has almost \$450,000 in progeny sales against her name, the \$110,000 Rolls Royce R275 among them. Full brothers to these heifers fetched \$35,000 at our sale last year. Male pregnancy confirmed from AI to Rocketman NMMR38 on 12/10/22. Full sisters sell at Lots 128, 133 & 167.

These Ulong heifers present something you simply cannot access anywhere else right now. Established as a fabulous maternal influence for the breed, through the likes of grand son Matauri Reality, Ulong was an easy choice for us to revisit as an alternate bloodline for the herd. S291 is the first calf from a beautiful young cow, bred in the pink. S291 & her dam are yet more descendants of the extraordinary Abigail Y116/B10 line, with the magnificent M293 as grand dam. S291's pedigree strength is reinforced by Marlon Brando as maternal grand sire. A product of Klooney mated with Kingdom's dam Flower G41, Brando has earned a stirring reputation for the quality of his daughters across the land. Male pregnancy confirmed from AI to Paratrooper NMMP15 on 12/10/22 completes an excellent package.

I harp about the maternal side of things, but it's what my father and I have concentrated on for 54 years. Another classic maternally concentrated pedigree here with Chisum 255 and Kruse Time combined behind S288. Male pregnancy confirmed from AI to the record breaker, Rocketman NMMR38 on 12/10/22. It carries an ideally balanced predicted data set, just where we aim, to cover all the bases.

Loving the history of the breed, I enjoyed tracing the family trees whilst compiling the catalogue. This is another heifer that epitomises the discipline of my Dad, and the current generation, to stay the course in pursuit of the best Angus cows we can breed. Old readers will enjoy the names behind this girl: Purdy 11th, Clover Nullah, Hazeldean Rapier, Winton Lad, Powerplay M032, Henry VIII, Woody W100 & Highlander of Stern. It is a priceless roll call of maternal Angus royalty, through generations of cattle and humans alike. A sweet young Nugget heifer here. We love the Nugget influence on the herd. S407 carries a male pregnancy confirmed from AI to Rembrandt NMMR48 on 12/10/22. We expect big things from the Rembrandt x Nugget combination. Their phenotype and genotype match up is perfect.

Stunning heifer from an equally stunning donor dam, descended from the potent Flower G20/S110 line. S173's full sister sells at Lot 156. Their dam has produced several high end bulls including the \$42,000, =2nd high selling bull at our Australian record averaging 2020 bull sale. We flushed S173 as a maiden with three calves due in Spring. She carries a confirmed female pregnancy from AI to Rocketman NMMR38 on 2/12/22. It comes right from the hub of our programme. This is an exceptional prospect.

Very stylish heifer, the first calf of an equally attractive cow in Prue Q318. S318 is sired by the rather unheralded sire Milestone M308. Certainly the best Reality son I have seen, Milestone slipped right under the radar for \$16,000 at our 2018 sale, where the breed's top five high selling bulls of the year all sold the same day. Milestone is doing excellent things here and at Coffin Creek & Kinarra, leaving especially attractive daughters. Female pregnancy confirmed here from AI to Paratrooper NMM15 on 12/10/22. NB S318 has scarring on her near side eye from thistle damage.

EXPECTED FEMALE PROGENY DETAILS

Another heifer from the vast influence of the Flower G20/Y141 line. The sire, Quentin Q166 attracted the \$32,000 highest bid price for a yearling at our 2020 sale. S216's dam K47 is a strong earner for us, including a yearling son in 2019 at \$22,000, and an excellent Nugget son to Iain & Amy Gentle for \$32,000 at our 2021 sale. Female pregnancy confirmed from AI to Rector NMMR53 on 8/11/22.

We love the Marlon Brando females. He is a product of Klooney and the dam of the \$150,000 former record priced bull of the breed, Kingdom K35. The Brando daughters possess so much femininity and poise, with exceptional skeletal structure and udder quality. Legendary influences Abigail Y116 & B10 underwrite the ancestry here once more. S417's dam is a massive capacity cow with a solid production record for us. Female pregnancy confirmed from AI to Nugget NMMN266 on 12/10/22.

S200 is a striking heifer from a spectacular donor dam. We flushed S200 as a maiden for five embryos. She is sired by the widely used industry sire Quixote Q96 who was the \$60,000 high seller at our 2020 sale. The dam's first son sold for \$32,000 in 2021. Fascinating female pregnancy confirmed from AI to Taimate Roy NZE12865020R38 on 28/12/22. It carries substantial genetic diversity, coupled with an excellent data set and presents as another super exciting prospect in utero. Full sister sells at Lot 161.

S254 comes from a massive volume donor cow, with an excellent bull sale record, highlighted by S328, the full brother to this heifer. He fetched \$44,000 to JS Grazing at our sale last year, as the heaviest weight for age yearling bull we have produced. I love the genetic match up behind the male pregnancy, confirmed from AI to Ramjet NJWR1029 on 12/10/22. It is just another example of the rare "open herd" access to our front line that this sale presents.

A unique pedigree here, backed by the wonderful matriarch cow Y33 and her excellent daughter Brenda F6 who cleared over \$200,000 in earnings for us. S312's dam is sired by Aviator. Following almost delirious reaction from the many Australians who inspected him in the US, Aviator only ended up having rare input here. Just 30 straws cleared customs. S312 is a lovely moderate type to inspect. She carries a confirmed female pregnancy from AI to Ramjet NJWR1029 on 25/11/22. It is another prospect with great appeal.

S193 is phenotypically hard to improve. She is just so feminine, soft and easy doing, with typical Paratrooper presence and charisma. Her pedigree is a veritable who's who of our programme over the past decade, with Paratrooper, Klooney, Kingdom's dam and Kruse Time all rolled into the one genetic package. She carries a male pregnancy confirmed from AI to Taimate Roy NZE12865020R38 on 17/10/22.

S190 is a beautiful example of the breed and natural calf of the magnificent donor cow, Flower N86. They descend from the Flower G20/S110 line. S190's ET sister sells at Lot 147. Their dam has produced several high end bulls including the \$42,000, =2nd high selling bull at our Australian record averaging 2020 bull sale. We flushed S190 (as well as her sister), as a maiden, with three embryos to implant in May. She carries a cracking male pregnancy confirmed from AI to Taimate Roy NZE12865020R38 on 16/10/22. Like so many of the calves and pregnancies in this sale, the progeny here has unlimited potential. Foundation quality, right from the frontier of our operation.

Another derivative of the wonderful Brenda Y33 line, with a double shot of Hingaia 469 in the mix. We fancy the Marlon Brando daughters as future stalwarts of the herd. Witness Lots 36 & 45 in the cow & calf section of the sale to see their superb type at maturity. S182's dam is a good producer for us with sons to \$28,000. The male pregnancy confirmed, from AI to Rocketman NMMR38 on 17/10/22, should deliver a special result.

From the Abigail S104 line, with a lovely Klooney dam, S213 & her ET sister that sells next make a splendid pair. The same Paratrooper x Klooney sire/grand sire combination they carry met astonishing demand at our last bull sale. 16 of them sold to average just shy of \$52,000, underpinning the world record result achieved that day. Male pregnancy confirmed from AI to Ramjet NJWR1029 on 16/10/22. Full sister is next in the ring.

Soft, earlier maturing type descended from the ubiquitous Abigail S104. Grand dam sells at Lot 7 in the mature donor section of the sale. Full brothers to the dam have sold for \$30,000 & \$32,000. The Paratrooper/Loch Up combination has enjoyed phenomenal demand at our two recent world record sales. Seven of them bettered the sale average price by almost \$10,000 last year. Male pregnancy confirmed from AI to Sovereign NMM21S371 on 25/11/22.

We love the influence of Nectar in the herd. He is backed by one of the great cows in Prue H113 who was the first Angus cow in Australia to deliver three sons at \$40,000 or better. She builds on the stellar input of the famous Bangadang Lowan A61, sitting two generations behind Hector. Nectar puts so much depth of quarter into his progeny with excellent skeletal and udder structure in the daughters. Paratrooper NMMP15 is the perfect complement to Nectar in the female pregnancy confirmed from AI on 4/11/22.

Special heifer here. Her dam P152 is an exquisite cow, breeding in similar vein to her own type, and destined to become one of the lynch pin donor cows of the herd. S310 is her first daughter. She carries the mighty Paratrooper/Loch Up cross that ignited the market place at our last two bull sales. Her grand dam is the influential donor cow that sells at Lot 7. They all descend from the grand matriarch Abigail S104. S310 is a beautiful easy keeping female, oozing feminine style. She carries a confirmed female pregnancy, with boundless potential, from AI to Ramjet NJWR1029 on 12/10/22.

A lovely heifer here sired by the high selling bull of the breed from 2016. Loch Up is building a great reputation as the sire of potent brood cows. His daughter was the dam of Sugar Ray, the \$160,000 Nectar son that topped our sale last year to Ascot & JT Angus. That was the centre piece of a fabulous maternal grand sire effort that saw 15 Loch Up grand sons average \$51,600. Two yearling full brothers to S257 made \$30,000 & \$32,000 the same day. Male pregnancy confirmed from AI to Paratrooper NMMP15 on 4/11/22. Seven bulls with the Paratrooper/Loch Up pedigree averaged a whopping \$54,000 last year, highlighting the extraordinary potential these females carry in utero. S257's dam sells as Lot 7 in the mature cow & calf section of the sale, while maternal sisters sell at Lots 51 & 52.

A descendant of the great matriarchs Abigail Y116 & B10, with typical Nugget structural neatness. Female pregnancy confirmed from AI to Rembrandt NMMR48 on 12/10/22. Early indications are that the Rembrandt, Nugget cross is going to be a major hit.

I love the sire of this heifer. He was purchased as a yearling by the Greville family from Gin Gin in WA at our 2020 sale for \$22,000. Q124's full sisters are exceptional mature cows that feature in the cow/calf section of this offering at Lots 36 & 45. With Marlon Brando, Klooney and Kingdom's dam on the top side of the pedigree and a lovely Nugget daughter as her dam, S220's female pregnancy, confirmed from AI to Rocketman NMMR38 on 16/10/22, is true heart of the herd material.

If you've read the comments all the way, thanks for staying the distance. The genetic history of the cattle has always been an obsessive fascination. We finish with a delightful heifer here. Like her dam and grand dam, S205 is an incredibly easy doing female. Her mum, Q11, is one of the sweetest looking cows you could see. The maternal background here is so strong. Descended from the wonderful matron Abigail S104, with cow making legends like Hingaia 469, Henry VIII & Woody W100 dotted through her ancestry, plus the excellent Witherswood input of Kerry D8, S205's pedigree encapsulates everything about the Millah Murrah programme - Our game is breeding cows. We round out the day with a cracking prospect here in the male pregnancy confirmed from AI to Rocketman NMMR38 on 16/10/22.

Purchaser:

\$:

A lot has happened since our last female sale. Both Wyatt & Winsome Thompson have passed on. Wyatt departed less than two months after the sale in October 2017. It was one of the proudest days of his life and such a fitting swansong. Mum too, enjoyed that time immensely, despite the difficulties she endured without complaint in the final years of her life.

We joined forces with Trent Walker and his family in 2018. The success of that collaboration is beyond anything Trent and I dared hope. What started as a short-term venture is now in its 6th year. Dimity and I thank Trent and his family for their absolute commitment to the job.

The Millah Murrah stud would not be what it is without the dedication of my parents before us, and my sister Jane's unwavering devotion to the cattle. Kevin Betts, Tony Gullifer, and Duncan Ferguson are our saviors with all things farm related. We recognize Andrew Bickford for his tireless help as our stock Agent, friend, and occasional hand on the farm.

These are just the key figures involved directly in the daily operations of Millah Murrah Angus. There are so many more people who help.

Dimity and I thank you all.

MILLAH MURRAH ANGUS FEMALE SALE PRE-REGISTRATION FORM

We encourage all potential buyers to consider registering before sale day. While it is greatly appreciated, there is no compulsion to register prior to attendance at the sale. Pre-registered attendees will simply ask at the desk for their bid card and go on their way.

[An online version of this form can be found on our website: www.millahmurrah.com](http://www.millahmurrah.com)

2023 - V. HENRY BULLOCK'S HEIFERS
 8 months sale in call to ET Brothers sired by Klooney

These heifers are designed very well, big bodied and huge rib with an extra wide pan set. They have a thick wide muscle pattern over the top that carries down into an aggressive and impressive rear quarter. Even with all this power from the shoulder back, they maintain an angular, long front end to give them added appeal! They are heavy bred to feed fresh milk ET Brothers sired by the \$10,000 Milsh Murry Klooney M42 that exhibits exceptional calving ease traits, as well as milk. A material prize to them is with ABS in the UK and is a craft topper for carcass traits.
